Topic → Climate Change in Pakistan: Causes and consequences.

Brainstorm:

- nuclear leakage threat
- weak institutions
- weak laws, no reenforcement (3rd Gov, models etc)
- No punitive measures
- way forward?
- weak Economy (need FDI so are lower standards).
- Swat floods
- loss of life
- Tourism get affected negatively
- over population
- deforestation

Rivers thirsty
Cloud bursting → Charged Rs 1.5 million
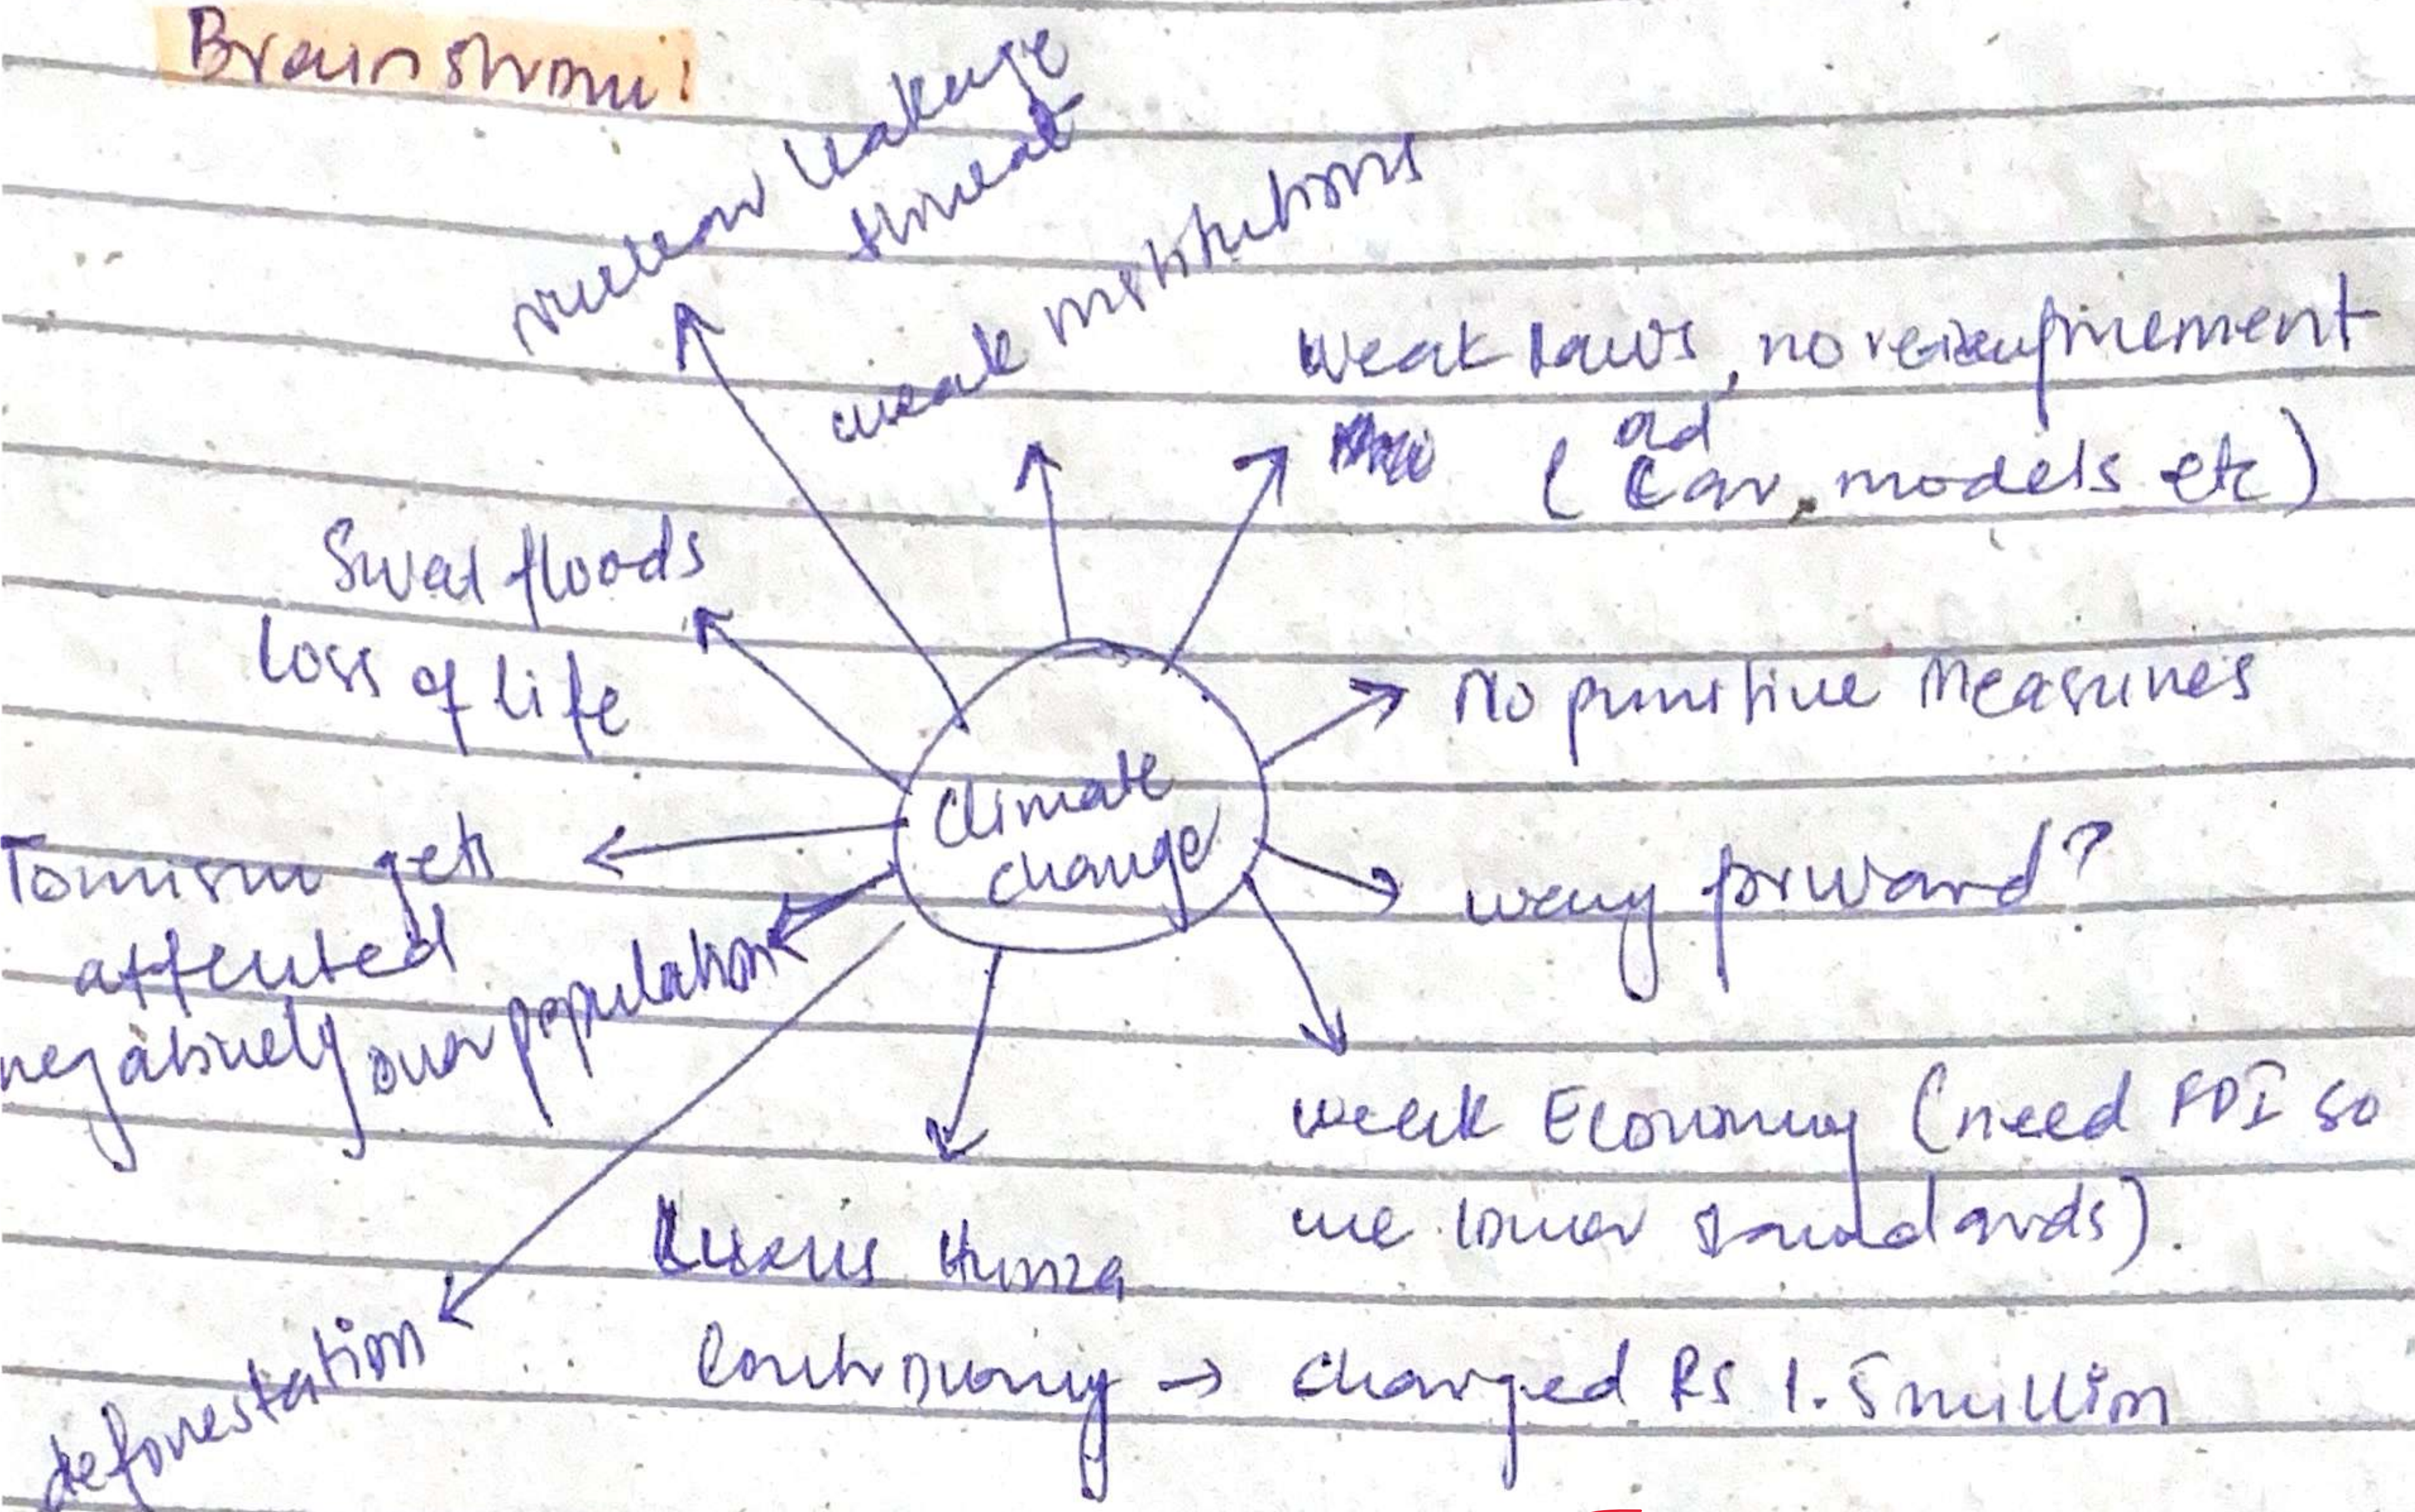

OUTLINE

1. Introduction
1.1 Attention grabber
1.2 Background info
1.3 Thesis Statement : Pakistan is regarded as one of the worlds most climate vulnerable countries with a multitude of factors promulgating its growth: over population, deforestation, weak institutions and law enforcement agencies coupled with the overall low economic status of the country. Efforts to curb the situation are ongoing with steps such as reforestation, implementable reforms and much more.
