

Assignment # 02 :-

Paragraph in Essay writing :-

→ Lack of efficient Human resources in higher educational Institutes :-

One of the major ill is the lack of efficient human resources in higher educational institutes of Pakistan. Institutes are hiring more and more visiting faculty to reduce their rate of expenses. Prioritizing their ill mindset over youths better progress. By doing so they are ignoring the fact that nothing is more important than giving quality education to youth. Another important aspect is Brain drain. The loss of competitive humans that our nation is facing in form of migration of competitive and passionate teachers, a major ill in lack of efficient human resources. My own relative, a very competitive PhD from Germany is moving abroad because he has an opportunity of

of a better future: and career there.

As a result teachers left in Pakistan are not passionate enough anymore.

Along with university faculty members, university management is also at stake.

There is a rush of students in universities now a days. When I started my

university we only had 150 students in our batch. However, now the

amount of students is increased to 600.

This overenrollment of students creates excessive burden on faculty members.

Together both of these aspects are root cause of lack of efficient human resources.

Extensive grammatical mistakes
Avoid personal anecdotes
Maintain subject verb agreement
Maintain the coherence
Passionate teachers don't fall
under lack of human resource
management
Bring clarity in your ideas
