

Q3 For his morning walk Aslam went 110 km toward east

$$110 - 50 = 60m$$

$$120 - 40$$

$$= 80$$

$$H^2 = B^2 + P^2$$

$$H^2 = 3600 + 6400$$

$$\sqrt{H^2} = \sqrt{10000}$$

$$H = 100$$

Distance from his house = 100 m.
