# \* Climate change :-

## Hook :-

Pakistan stands among the top 10 countries, most vulnerable in the world. Although Pakistan contributes less than 1% to global greenhouse emissions. This paradox highlights the disproportionate burden of climate change on developing nation already struggling with poverty, governance issues and energy crises.

## Thesis Statement :-

Climate change in Pakistan primarily caused by global warming has devastating consequences in the form of floods, droughts, extreme weather conditions, economic crises.

line

# Introduction

Hook and thesis statement are the part of Introduction

## = Causes of climate change

### 1. Global warming

1.1 Industrialization

1.2 green house effect.

### 2. Deforestation :-

2.1 Domestic use

2.2 commercial use

### 3 Rapid Urbanization

3.1 Uncontrolled population

3.2 Unplanned housing societies

3.3 poor management

### 4 Extreme weather condition

4.1 Floods

4.2

# Consequence

## 1 Melting glaciers

- Floods
- Land sliding
- Increasing temperature

## 2. Extreme weather condition

- Heat ~~strokes~~ Waves
- Extrem and Wild monsoon.
- Drought

## 3 Flood

- Flash floods
- Mass displacement
- public health crises
- climate refuges
- Urban floods
- Coastal floods

## 4. Economic Loss

- Human loss

- Agricultural Loss
- Loss of jobs
- Poverty
- Infrastructural damage.

## Conclusion :-

Write a comprehensive outline
