## The Essay

The genocide in Gaza has been crossing all the limits. There's a brutal massacre and human rights violation being covered by social media since October 7. The death toll of Palestinians has now reached 60,000 where the injured are nearly 200,000. And this is only the registered consensus. There is a huge number displaced and buried in the rubble. It has been almost 19 months now since the Israel-Palestine conflict began, where the knowledge of such conflict is spread throughout the world by social media. Social media is both a megaphone for truth and a weapon for manipulation and it is playing the role just accordingly; public and private social media platforms are being used to spread the truth around the world as well as an equipment to manipulate Public Opinion. For example, Al-Jazeera, an international news channel confirms the ongoing genocide of Palestinians in Gaza by Israeli forces while the Israeli news channels, on the other hand, ensure not a single death in the same Gaza to manipulate the public. This is how the social media works towards the biggest issue of the day. This essay presents the background of Israel-Palestine conflict and the role of social media as a voice to the oppressors. It also highlights

the impact of social media on public opinion and political policy and decision making. However, it also portrays how social media is being used to propagate information and misinformation in relation to Israel-Palestine conflict.
