

Importance of Greenery in Urban life

2021

~~as a~~ Green sites in urban cities serve place of relaxation and calmness in choice of city life. Parks serve as bird sanctuaries, a place of community bonding, space for picnic and concerts, exhibition centres which defines its role not as only as aesthetic place but also urban development culture.

Parks lessen urban heat island effect, stress and over all mental health issues. The real challenge is to create road side trees, parks, green rooftops to make urban life pleasing, enrich with ~~expansive~~ sounds of chirping of birds, along with life in concrete and glass.

not even a single precis rule and grammar rules is satisfied here
