

Climate change in Pakistan: Causes and Consequences

You points are fine

~~Outline: But work on articulation of your ideas~~

~~I. Introduction~~

~~II. Major Causes of Climate change in Pakistan~~

~~A. Deforestation on massive level~~

~~B. Rapid urbanization on agriculture land~~

~~C. Generation of massive solid waste with no proper management~~

~~D. Fossil fuel usage to generate energy~~

~~E. Weapons of mass destruction use and its development~~

~~F. Fragile policy of carbon emission~~

~~III. Major Consequences of climate change in Pakistan~~

~~A. melting of glaciers~~

~~B. damaging of urban area by floods~~

~~C. rising Sea levels~~

~~D. Damage to Agriculture land~~

~~E. Increment in poverty~~

~~F. Leading to Food insecurity~~

~~IV. Some suggested measures to stop frequent climate change.~~

~~A. Reforestation on massive levels~~

~~B. Increase the use of clean energy instead of fossil fuels~~

~~C. Implement a proper mechanism of solid waste management~~

~~D. Impose penalties on industries for generation of excessive carbon~~

~~V. Conclusion~~
