Economic sustainability serves as a cornerstone for a nation's long-term sovereignty, political stability, and global ranking. The concept encompasses prolonged economic growth with the core goals of social welfare, environmental protection and cultural preservation. Its significance is derived from its ability to bring about sustainable practices, consequently propelling a sound and stable future economy. Moreover, in the context of Pakistan, according to the economic survey, 2024-2025, Pakistan's real GDP is provisionally estimated to have grown by 2.68%, with a sharp decline in inflation and³⁰ increase in per capita income. Beyond its core principles, economic sustainability can offer many prospects, such as the promotion of a circular economy, transition to green energy, and the achievement of several

Sustainable Development Goals. ⁴⁰
However, achieving these prospects requires addressing multiple issues and implementing numerous solutions. These solutions include supporting circular business model, boosting renewable energy and aligning policies with Global Sustainable Development Goals. Hence, economic sustainability forms the bedrock of Pakistan's development, but several issues⁴¹ are obstructing its developmental trajectory. This essay discusses the prospects of ^{the} a sustainable economy in Pakistan.¹⁶

Economic sustainability provides a resilient foundation, serving as a bedrock for a nation's robust social and political advancement, leading to enduring development.

It refers to the adoption of certain practices that promote lasting economic growth without negatively impacting the social, environmental and cultural aspects of the society. Its importance is demonstrated by its role as a cornerstone of global stability and a foundation for a robust future economy. Moreover, the current economic situation in Pakistan represents a drop in inflation and the implementation of structural reforms, such as digitization to improve transparency in the tax and energy sector. These changes will become a foundation for economic sustainability. Furthermore, economic sustainability presents a wide range of prospects, including the prom-

ation of circular economy, transition to green energy and contribution towards the attainment of several SDGs. Significantly, these prospects can be achieved by overcoming the problems and implementing effective practical measures. These solutions include supporting circular business model, boosting renewable energy and aligning policies with the global Sustainable Development Goals (SDGs). Hence, economic sustainability is the cornerstone of Pakistan's development, but several challenges are hindering its pathway to developmental trajectory. This essay discusses the prospects of a sustainable economy in achieving national prosperity, acting as a potent catalyst, not only boosting economies but also paving the way for the formation of a more resilient and fair society.

A sustainable economy is a key driver of a nation's prosperity, ensuring a bright future for the coming generations. It serves as a country's backbone helping it march towards social and political development. Certainly, economic sustainability is the practice of achieving long-term economic growth without negatively impacting the social, cultural and environmental aspects of the society. Its importance lies in its ability to create a resilient and stable economy for the future, promoting the progress and prosperity of the nation. It comprises of a fundamental shift from a linear economy to a circular economy. However, being a developing country, Pakistan has seen a sharp decline in inflation. Moreover, there are many promising prospects of economic sustainability in Pakistan. These include the promotion of circular

business model which possess the potential to create new job opportunities for millions of people, the transition to green energy which involves the use of renewable energy, and the completion of several sustainable development goals formulated by the UN.

Critically, these prospects can be possible by overcoming the existing issues. For this purpose certain essential steps are required to be taken. These solutions include supporting circular business model, boosting renewable energy and aligning policies with the global Sustainable Development Goals (SDGs). These solutions could bring positive outcomes. They have the potential to accelerate the progress, leading to economic sustainability. Hence economic stability is the backbone of Pakistan's development and several issues are hindering its pathway to sustainable progress.

A strong economy shapes a nation's ambitions driving both social cohesion and political stability. Conversely, continuous economic crisis hampers a state's overall functioning. Unfortunately, Pakistan is among those struggling states where flawed and insufficient economic crisis strategies can cripple the foundational system. According to the World Bank report on Pakistan namely, "Pakistan development update: 'Reimagining a Digital Pakistan'". Pakistan has 'turned the corner' on macroeconomic instability, but a lot of difficult work remains to be done to achieve real, lasting prosperity for its citizens. Additionally, Pakistan's current GDP is estimated to be 411 billion dollars for the fiscal year 2024-2025, with a provisional growth rate of 2.68%. Furthermore,

if the economic crisis of the country remains unaddressed it would lead to increase in poverty, exacerbated fiscal strain and debt burden and a breakdown of global trade. Nevertheless, adopting effective strategies can mitigate the implications of economic crisis by introducing human capital programs, improving the exports quality and implementing strict policies to improve tax revenue. Therefore, it is high time Pakistan took this issue seriously and rooted out the causes of these implications. This essay discusses the implications of economic crisis in Pakistan and outlines the way forward to mitigate them.

The economy is the foundation of a nation's prosperity, enabling it to thrive politically and socially. However, when economic stewardship falters, it obstructs the essential channels of development. Regrettably, Pakistan is among

those developing nations that are struggling to strengthen their economic foundations. According to the International Monetary Fund (IMF) latest article IV, Pakistan's economy is undergoing macroeconomic stabilization, with disinflation and a rebound in GDP growth. However, the country's fiscal deficit and structural fiscal deficit rigidities are major obstacles to achieving sustainable, inclusive growth.

Additionally, Pakistan's current GDP is estimated to be 411 billion dollars for the Fiscal year 2024-2025, with a provisional growth rate of 2.68%. This represents an increase from the previous year.

Nevertheless, it still behind lags when compared to other developing nations. Moreover, ~~it~~ if ^{1st} ^{ad} ^{ress} ^{ed}, the economic crisis would lead to exacerbated poverty, increased fiscal strain and debt burden, and the breakdown of global trade connections, ultimately hampering the state's overall functioning. Nonetheless, adopting effective strategies can mitigate the implications of ~~a~~ economic crisis. These strategies include introducing human development programs, improving exports quality, and implementing strict policies to improve tax revenue. Hence, it is high time Pakistan must ~~took~~ this issue seriously and address the root cause of these implications. This essay discusses the implications of economic crisis in Pakistan and outlines the way forward to mitigate them.

A robust economic framework is the corner of a nation's prosperity, propelling it towards resilient social and political advancement. However, economic crisis serves as a bottleneck to a state's developmental trajectory. Ironically, Pakistan is no exception and has been counted among those developing nations that are struggling to strengthen their economic affairs. According to the Pakistan Institute of Development Economics (PIDE), Pakistan has achieved a level of macroeconomics stabilization by using high interest rates, but this approach has negatively affected industrial growth. The think tank therefore recommends that the government must cut the central bank policy rate to encourage economic activity and expansion. Moreover, Pakistan's current GDP is expected to be 411 billion dollars, for the Fiscal

year 2024-2025. The provisional growth rate is 2.68%. This represents that the country is facing severe economic crisis. Sorrowfully, if the economic crisis remains unaddressed, it would lead to exacerbated poverty, increased fiscal strain and debt burden, and the breakdown of global trade connections. Consequently, faltering the socio-economic fabric of the country. However, the avoid such implications by taking certain effective steps. These steps include introducing human capital programs, improving exports quality and implementing strict policies to improve tax revenue. Hence, addressing the economic crisis in Pakistan is of utmost importance, and prompt steps must be taken. It is high time Pakistan took this issue seriously and eliminated the underlying

causes of the crisis itself. This essay illustrates the implications of economic crisis in Pakistan and proposes the way forwards to eliminate the underlying causes.
