3.3. Strict regulatory mechanisms

3.3.1. Drug monitoring mechanisms

3.3.2. Strict penalties for unprescribed use of drugs

3.3.3. Zero tolerance policies in educational

institutions

4. Conclusion

The Essay

"A nation is not lost because of the destruction of its infrastructure, but because of the destruction of its Youth." - Hazrat Ali (R.A).

History is witness that it was never wars alone that destroyed nations, but the decline of its Youth.

The World has seen disastrous wars that wiped out entire civilizations, yet those crippled nations rose and became great again. Nevertheless, there are more pressing issues today that are paralysing national development and especially targeting the youth. The increase usage of drugs appears to be one of the prime.

The World Drug Report estimates that 316 million people used drugs in 2023. Drugs include substances that have serious negative impacts on both physical and mental well-being of individuals. The young populations, majority of the

developing nations - considered as the future of a nation, are more vulnerable to this risk. The sharp rise in drug use is caused by underlying social and economic issues and lack of awareness, demanding urgent actions across societal and economic levels, with strict regulatory policies.
