The Essay

Poverty is a barrier to progress but education is the bridge to a better life.

Poverty is not just lack of money; it's a lack of opportunity, a lack of access and lack of upgradation. For the prosperity of any nation, poverty is the main challenge.

In Pakistan more the 45% of population is living below poverty line.

Though Pakistan is enriched with resources yet disparity in resource

Your introduction must revolve around prosperity not poverty

distribution and access needs to be done. As Pakistan navigates the complexities of the 21st century its prosperity hinges on Eradication of poverty, Reforms in Educational Sector, Adaptation to digitized world Media literacy and stable political lead. This multipaeted approach will unlock Pakistan's dynamic potential and lead it to promising prosperity.

Poverty is not merely the absence of wealth. Absence of oppurtunities of learning is alarming. Eradication of it will be translated into nation's progress. In Pakistan poverty is the outcome of deliberate policy choices, neglect and systemic flaw. Due to such negligence today 26 million ~~stu~~ childrens are out of school or even state of school leaving. Children is rising now. To overcome this issue state should form Online learning platform and provide free education. As the Article 25-A states; Right to free and compulsory education for children aged 5-16 years. To over come this challenge state should creat platforms providing free education. Online learning platforms could serve this purpose. Though its a nonformal education, still it will help the learner to learn at ease. ~~But~~

However, smooth internet connection is mandatory for this purpose. Rural areas suffer network issues more than urban regions. These online courses should be certified by government.

As virtual university is an excellent example offering this mode of education. As 'Certification' will help the learner to secure any job by providing his certificate as the evidence of ^{learned} skill.

Government needs focused policies to address critical issues otherwise success and prosperity to this land is near to impossible.

Education just for the sake of degree is not beneficial until unless learner lack life skills. Life skills are the part of the curricula in many countries but unfortunately in Pakistan, most public universities remained locked a governance model built for another era and another purpose. British administrators set up universities here to produce clerks for Raj, not independent scholars. Because people who think independently demand accountability. Life skill based education gives adolescents essential knowledge about Puberty, Consent, Peer pressure and personal safety. In the 21st century, a university's role goes far beyond conventional teaching methods. Globally campuses derive technology revolution

Seed start-ups and shape public discourse. Pakistan needs to learn from these nations. Alinging Education and industries will help it to foster socially and economically. Examination system should be modified to evaluate critical thinking not memory. This will enable individuals to become entrepreneurs and creat employment opportunities for others. Analytical and Creative thinkers will creat an environment of Competition and this competitive environment will accelerates pakistan's success. Moreover this will diminish unemployment issue as well.

To uproot poverty or even reducing it demands equality among all the provinces in Pakistan. Disparity among provinces even in districts of same province needs to be address for Pakistan's prosperity. People leaving in Baluchistan or merged districts lack basic facilities of living. If They are provided with basic life standards including food, home, education and health facilities then they will stand with state and will work for its welfare. State should make structural reforms in neglected areas to unlock its full potential. Investmen on

DATE: ___/___/___

human Capital uplift nation and bring peace in it. Ensuring unity among nation is utmost need for country's success. It's a long term investment with promising outcomes. After education health facilities in such regions must be optimized. They lack roads for transport that hinders their access to educational institutes as well as hospitals. Reforms in infrastructure and development of neglected areas is the necessity for the prosperous nation.

Write valid and relevant arguments

Avoid unnecessary details

You don't need to mention poverty as a whole but how to tackle poverty to set Pakistan on the path to prosperity

Highlight how inclusive institutions and inclusive policy measures help to set Pakistan
