Question: 2 Precis

Title: Urban Green Spaces: Sustainable Urban Planning And Human Progress.

Urban green spaces are vital for sustainable urban planning and human progress. They offer peace, relaxation, connection to nature, and preserve environment. They also serve as venues for cultural and social activities. They contribute in mental well-being by giving access to nature. However, the challenge in sustainable develop urban development is to preserve green spaces. To foster sustainable urban planning and human progress in urban cities, it is important to put efforts in maintaining parks, green rooftops, and tree-linked avenues.
