6 - Conclusion -

Begum feroz khan noon helped pakistan to acquire gwadar through successful diplomacy, Showing that women can effectively contribute in nation interest. The frailty of women is reducing day by day. The literacy rate of women is increasing. And the educated woman is more strong than uneducated women. The participation of women is increasing, and they are sitting in parliament and running the government. The participation of women is

increasing in workforce. And they are contributing in economy of country. Women are doing research and getting the education in latest science and technology. Every year the results of women in Competitive exams is increasing and they are working in decision making positions. The self confidence of women is increasing. But they are facing the strict patriarchal Challenges. They are facing the wage Gap as compare to men. Although, some Challenges exist but movement are running on state level and individual level to promote the women make more strengthen. In the modern world, women have shattered the myth of fragility by proving their strength in social, economic, political, scientific and military spheres.
