Conclusion

The Essay

Intellectuals are the assets of any country. Because they push the society toward Progress and Prosperity. According to 'Plato', societies should be ruled by the intellectuals.

It is so scary to think what happens when the people of these type leave the country, what will be the future of country.

Brain drain, is actually the emigration of highly qualified and skillfull People from a developing country to a developed country.

Developing country facing the Problem of brain drain from Last few Years.

But now this is so common, that every Person who get any knowledge about developed countries, (of their living conditions and better opportunities for Job) want to go there.
