DAY: _____

" We are the first generation to feel the impacts of climate change and the last generation that can do something about it "

Barack Obama ✓

Climate change is a global environmental crisis which is uprisen by human activities after the industrial revolution.

The process of industrialization and economic competition have altered the composition of atmosphere. Similarly, the process of deforestation for agriculture and urban expansion have limited trees for absorption of carbon dioxide (CO_2). The old agriculture method and excessive use of fertilizers have boost the phenomenon of climate change. On the other hand, the process of climate change has been rising the global temperature across the world. It also caused
