

Assignment 01 → Batch OB-87

Hafiza Maham Shafiq

Date

Subject

Topic: Climate Change

The topic given is not just climate change. Properly note down the topic.

Outline

1- Introduction

a) Hook

b) Global issue that affects the environment, temperature, and human life.

c) Thesis Statement: Climate change is a major problem for our country. It is caused by deforestation, fossil fuel burning, urbanization, the greenhouse effect, and poor waste management. As a result, the country faces floods, rising temperatures, health problems, and economic losses.

The topic given is not about a single state or specifically Pakistan. So do not make the thesis statement about a single state.

2- Causes

Write a topic specific heading

1- Deforestation

All headings and subheadings must be in the form of self-explanatory phrases or short sentences.

a) Illegal forest cutting

b) Forest fires

c) Agriculture expansion

These explain why deforestation occurs not how it leads to climate change. The purpose or supporting point is to explain your argument, not write things associated with it.

2- Burning of Fossil Fuels

a) Industrial energy use

b) Power generation

c) Dependence on non-renewable energy

d) Transportation

Again these are various uses of fossil fuels not how fossil fuels burning leads to climate change

3- Urbanization and Population Growth

Two separate arguments cannot be discussed together

a) Higher transportation emissions

Repetitive. You've mentioned this in the fossil fuel point

Date

Subject

- b) Increased energy demand
- c) Increased waste generation

4- Greenhouse Effect

- a) Methane emissions
- b) Increased Concentration of CO_2
- c) Industrial greenhouse gases

Overlaps everything else

5- Waste Management

- a) Burning of garbage & plastic
- b) Poor waste disposal practices

Discussed in urbanisation point

3- Consequences

1) Climate Vulnerability in South Asia

- a) Water scarcity
- b) Rising temperatures
- c) Agriculture decline
- d) Glacial Melt and GLOF

Why specifically in South Asia? Discuss the overall consequences

2) Flooding and Water-related Disasters

- a) Human displacement and loss of life
- b) Damaged infrastructure
- c) Environmental effects

In the supporting point you are to explain how climate change causes water related disasters not how many impacts these disasters have

3) Rising Temperature (Heat waves)

- a) Heat stress and health
- b) High evaporation

4) Economic Losses

- a) Cost of recovery and

reconstruction
EDEN NOTES

Date

Subject

b) Lost productivity

c) Higher prices of goods

5) Public Health Impacts

a) Respiratory and Cardiovascular issues

b) Increased illness after floods

4- Solutions

a) Forest Protection

b) Clean and renewable energy

c) Sustainable urban planning

d) Climate-smart agriculture / strong climate policies

e) Improved waste management

f) Public Awareness and Education

Follow the same structure throughout the outline

5- Conclusion

a) Thesis Statement

b) Summary

c) Future thought
