

The official name of our species is homo sapiens; but there are many anthropologists who prefer to think of man as homo Faber-the smith, the maker of tools. It would be possible, I think, to reconcile these two definitions in a third. If man is a knower and an efficient doer, it is only because he is also a talker. In order to be Faber and Sapiens, Homo must first be loquax, the loquacious one. Without language we should merely be hairless chimpanzees. Indeed we should be something much worse. Possessed of a high IQ but no language, we should be like the Yahoos of Gulliver's Travels- Creatures too clever to be guided by instinct, too Self-centered to live in a state of animal grace, and therefore condemned forever, frustrated and malignant, between contented apehood and aspiring humanity. It was language that made possible the accumulation of knowledge and the broadcasting of information. It was language that permitted the expression of religious insight, the formulation of ethical ideals, the codification of laws. It was language, in a word, that turned us into human beings and gave birth to civilization.

Human beings are homo sapiens. ~~and~~^A anthropologist^s also call them homo Faber-the smith. According to ~~author~~^{the author}, humans can be both ~~if~~^{because} they are good speakers. Language plays a key role. ~~If there were Humans~~ without language would be vulnerable and helpless though having wisdom. It is a medium to convey message. It has contributed to religion, morality and law. According to him, it ~~had~~^{has} made them human beings and progressive.

Title needs improvement.

Title: Language: Human Beings
Words Count: 68 / 185

Avoid cutting. Idea is ok. Spelling errors found.
