Essay Topic
Artificial Intelligence is The Death of Creativity

Introduction :- Artificial intelligence is the death of Creativity refers to the end of Creativity and innovations by human mind. Due to AI human becomes lazy, weak and are unable to perform any task efficiently or effectively. They totally depend onto the AI. The spirit of working hard, self motivation and self determination in human beings is decreasing day by day. AI is the main reason behind the low performance of individuals specially teenagers or students.

What is AI?

Artificial Intelligence is one of the branch of Computer Science that is used in technology. It is the smart system that is operated worldwide specially after Covid-19 pandemic it is commonly used. by it has both positive or Negative impact.

It includes

Chatbots, Softwares and Apps.

Impacts of AI that leads to the death of Creativity:

AI is one that have a huge impact on Creativity and innovations. Individuals are totally dependent on AI.

1. Lack of Creativity: ~~and~~

AI is the reason behind the lack of Creativity. Creativity is the one that is generated from mind but that human mind is ~~a~~ totally dependent on AI. The power of thinking and exploring ~~has~~ become weak. One is unable to brain storm new ideas. without AI individual is unable to perform any task ~~mostly~~

2. Lack of innovation: Innovation is

Something that is based on new ideas developments, features and trends and these can only be produced by the minds of individuals that are totally dependent onto the Artificial Intelligence. human are unable to brain storm and produce innovative and unique ideas.

3. Consume Abt. of time: Leads to the mismanagement and wastage of time. Individuals spend alot of time in using these

Impacts of AI that leads to the death of Creativity:

AI is one that have a huge impact on Creativity and innovation. Individuals are totally dependent on AI.

1. Lack of Creativity: ~~and~~

AI is the reason behind the lack of Creativity. Creativity is the one that is generated from mind but that human mind is totally dependent on AI. The power of thinking and exploring ~~has~~ become weak. One is unable to brainstorm new ideas. Without AI individual is unable to perform any task. ~~mostly~~

2. Lack of innovation: Innovation is something that is based on new ideas developments, features and trends and these can only be produced by the minds of individuals that are totally dependent on the Artificial Intelligence. human are unable to brainstorm and produce innovative and unique ideas.

3. Consume Abt. of time: Leads to the mismanagement and wastage of time. individuals spend abt. of time in using these

AI generalized tools. due to which they are unable to spend their time efficiently or effectively. Time is one of the most important aspect of life if lost time nothing will be left behind everything will be vanished. As of individuals who use AI frequently have damaged their lives and are not happy.

4. Effect on the family bonds and Relations : people spend alot of time on social media and AI based apps, those connections bonds of relationship become weak. by sitting together every individual is using their own smart device.

5. Effect of AI on Education AI has a huge impact on education of an individual student who is unable to generate ideas in mind and write it down. individual become blank without AI support. AI has vanished the power of brain of an individual. One who use to brain storm and generate new and innovative ideas. Students are unable to think out of the box, this decreases the score of an individual

and ~~Capex~~ Capacity of human mind. AI is the tool on which students completely depend and become like fish without water.

6. Lack of knowledge and information :

Due to AI, individuals is unable collect more content and information due to which marks are deducted in exam. through AI individual only collect the information that is need and just copy paste it without understanding. and gather enough information. for example during the competitive exam ~~if an~~ individuals share there point of view with the examiner with the Answer sheet. ~~but~~ so ~~if~~ those individuals who don't use AI and answer the examiner will qualify only because they wrote the information with their own mind set and ~~but~~ if an individual who uses AI for qualifying in exam will be officially out of the race. due to lack of content. Right Content for Right Result is necessary. to pass the competitive exam and sharing point of view the examiner.

7. **Effect of AI on Health:** Health of individuals is also affected by individ AI. day by day ~~into~~ individuals are becoming patient of depression, ~~anxiety~~ anxiety and ~~stress~~ stress. due to emotional as we have discussed in previous point- the effect of AI on relations led to the ~~day~~ depression and health issues. due to these issues people are becoming weak mentally and as well as physically. AI also has a huge impact on eyes. According to the survey of Pakistan round about 60% the population is wearing glasses, lens and have been operated. teenagers spend alot of time on social media using these AI generated tools even take dinner or lunch by using smart phones. "as if they stop using phones food will not be digested."

8. **Lack of physical Activities:** previously before the era of social media or AI individuals were active in physical activities and were fit and fine. and were living a life without diseases but after the social media and AI individuals every individual is surrounded by diseases. Living the life on machines and medicines.

teenagers and Adults are ~~the~~ become the target of obesity they are unable to lose weight which causes more health issues.

10. Lack of efficiency at work place - employees are unable to perform well due to the addiction of using AI in every task and ~~consequently~~ they are unable to solve uncertain problems that cannot be solved by AI and the solution are based on mind set of human being. ~~that~~ AI tools might causes the deficit in the company's growth. as the company's future is totally dependent onto the ~~the~~ Right ~~the~~ decision by ~~right~~ person ~~in~~ according to the situation which is only analysis by human beings.

Critical Analysis : AI ~~is~~ has both positive and Negative impacts as far as positive impact it has power to change the world, today the whole world is transformed from traditional to modern only because of AI, AI has played crucial role in each and every sector whether it could be education,

health, research and development, business and economy or etc. and increased the growth and development of the ~~glob~~ world. everything that has positive aspects also has negative impact that ~~harm~~ ~~have~~ harm the society, mental health of individuals who become the target or patient of depression. AI is the one that damages the capability of human mind. an individual is unable to think out of the box ~~due~~ only because of ~~Artifi~~ Artificial intelligence. Artificial intelligence is the death of Creativity and innovation. one is ~~unable~~ not able to brainstorm due to the total dependency on AI.

Conclusion — Artificial intelligence is the death to of Creativity refers to the individuals who totally depend onto the AI tools and are unable to think out of the box to generate new, unique, innovative and creative ideas.

for the growth and development of the city, province or country. even an individual is unable to write something or new ideas, or plans due to the lack of knowledge and information. Students spend alot of their time

in using AI, ~~the~~ which has the huge impact on education life style and health. AI is the reason behind lower workforce and lack of efficiency in employees physical fitness and health is also affected by AI. AI is the main reason behind these all aspects due to which the Creativity of mind is affected by AI. AI have both positive and Negative impacts. ~~positive~~ negative impacts are discussed above but the positive impacts are that AI has transformed the world from traditional to modern. It has plays through AI there is the growth and development in every sector whether medical, health education, business, economy or etc.

Outline

1. Introduction

2. What is Artificial Intelligence

3. Impacts of Artificial Intelligence that leads to the death of Creativity

3.1 Lack of Creativity

3.2 Lack of Innovation

3.3 Consume alot of time

3.4 Effects onto the family bonds and Relations

3.5 Effect of AI on education

3.6 Lack of knowledge and information

3.7 Effect of AI on Health

3.8 Lack of physical Activities

3.9 Lack of efficiency at work place

4. Critical Analysis

5. Conclusion

we need to
use artificial intelligence
