"The future of energy is clean, renewable and sustainable." (-Ban Ki-moon)

This quote means that the future ~~of~~ ^{will} depend on clean energy like the sun, wind, and water, which are safe and never run out.

Energy is very important for modern life. It is used ~~is~~ in homes, transports, and factories. But today the world is facing a big energy problem.

Some people think energy will never finish, but this is not true. Oil, gas and coal are ~~used~~ ^{using} too much, and ~~finishing~~ ^{they are} running out. The clean energy, like wind
