

Poverty the root cause of all socio-economic problems.

I Introduction

II Socio-economic problems arise from poverty

A Unemployment

B Increased crime ration

C Food scarcity and Malnourishment

III Causes of Poverty

A Overpopulation.

B Lack of governance.

C War on terror situation.

iv Remedial measures

A Educational awareness regarding population.

B Fair governance..

C Unbiased Meritocracy

V Conclusion

Socio-economic problems like unemployment, increased crime ratio and ongoing wars are all the outcomes of Poverty.

The causes behind poverty are lack of governance and the major is blooming baby boomers.

Strong governance on the State institutions and by the help of people that issue can be abated. Aristotle had said that, 'Poverty is the parent of revolution and crime'.

There are many socio-economic problems but we will discuss following in below paragraph.

Pakistani society is divided in three classes; upper, middle and lower class.

Youth of middle and lower class get their education with the sole aim to get jobs. Skilled youth of Pakistan is migrating towards foreign countries in seek of jobs.

That scenario is becoming bigger and bigger.

Extreme hunger and poverty converts human

into animals lacking the sense of right and wrong.

People turn towards crime for fulfilling their basic needs.

Some major cities of Pakistan like Karachi and others are included in the list of top dangerous cities of the World. Now people in their homes are unsafe due to increased crime ratios.

As per ^{state of} food security department reports almost 20.5% peoples in Pakistan are malnourished.

35.7% people in Pakistan is living below poverty line as per World Bank report.

Pakistan is included in the list of extreme climate affected stricken countries. Per acre yield of wheat, rice and sugarcane are going down as compared to past. There are many causes of poverty but

we will discuss following below.

As per reports of PBS total population of Pakistan is reached at 241.49 million with an annual growth rate of 2.55%. Speed of population is always greater than the speed of resources. In Pakistan, government initiated family planning and two kids policy but everything is failed in front of conservative society.

Incompetency of government is also main factor behind extreme poverty. High tariff and GST on import and export taking economy of Pakistan in downward spiral.

Elected government beside working on poverty elimination programs utilized their powers in crushing opposition. Civil and military bureaucracy blackmailed politicians for their own benefits.

War on terror in Pakistan by

insurgent groups of Taliban is causing billions of losses to Economy. Still KPK and Balochistan is destabilized, and facing casualties on daily basis. Balochistan Liberation Army attack on Chinese consulate in Karachi Hotel is a dreadful incident. CPEC and many other tourism projects are at halt due to unholy war. There are many remedial measures but we will discuss some of them below.

By the help of social and print media government should start educational awareness in the people regarding population. Ulemas and other educated people of communities can play their vital role in combating this issue. Healthcare departments officials must take their job seriously. Lady health workers in their respective localities educate mothers on the benefits of two kids ~~are~~ policy.

Our elected governments should

lessen poverty, if they use their energy for the benefit of masses. All the State departments should work fairly and promptly for people. Police, judiciary and accountability departments should be autonomous in their work.

Civilian and military bureaucracy sensitively cope the issues which the public is suffering. Everyone should be accountable for their acts whether they are civil or officials.

Recruitment of civil servants should be made through proper channels as per mentioned in 1973 constitution. Nepotism and favouritism culture in job recruitments should be discouraged and dealt with iron hands. Transparency and fairness in recruitment process will ensure reduction in poverty. Thomas Powell said, 'The real minimal wage is zero unemployment'.

To be concluded collaborative

efforts of State and individual is
the only way to reduce poverty.
All the civil and military
department should use their
might in curbing the menaces
of evil elements which are
obliterating country from inside
and outside. Recruitment process
of civil servants should be
on merit. New Reforms in
education and agricultural sector
should be introduced which financially
practically helps public in their
respective fields. Subsidies should
be given on import and exports
for uplifting the economy. ~~Finally~~
State focus its energy towards
poverty reduction by using all
the state institutions and Pakistan
will be
proper.
