

Climate Change Causes and Effects

Brain Storming

Outline

(1) Introduction.

1.1 Attention Grabber

1.2 Building sentences/ information

1.3 Thesis Statement

(2) Main Body

(A) Causes of climate change
in Pakistan

2.1 Human activities

2.1.1: Deforestation

2.1.2: Burning of fossil fuels

2.1.3 Urbanization.

2.1.4 Agriculture Emissions.

2.2 Industrial processes

2.2.1 27^{th} of global green house
gases. emission in Pakistan

2.2.2 No proper waste
management.

2.2.3 Emission of harmful
chemicals in open
environment.

2.3 Transportation

2.3.1 Emissions of gases.

2.3.2 Increased number of vehicles.

2.3.3 Freight transport.

2.4 Population growth and consumption patterns

2.4.1 Energy Demand

2.4.2 Resource consumption

2.4.3 waste generation.

2.5 No proper wastage systems.

2.5.1 Open Dumping.

2.5.2 Lack of Public awareness.

2.5.3 Lack of Infrastructure.

(B) Effects of climate change.

2.1 Disasters

2.1.1 Floods

2.1.2 Intense Heat waves

2.1.3 Natural Disasters (Earth quakes, volcanoes, Droughts)

Date _____ Day _____

2. Negative Impacts on Mental Health

2.2.1 Depression and Anxiety

2.2.2 Mental Disorders

2.2.3 Community disruption and social isolation.

2.3 changes in perception patterns

2.3.1 Rising of sea levels.

2.3.2 Increasing of global temperature.

2.3.3 Melting of glaciers.

2.3.4 Drought's

2.4 Pollution

2.4.1 Air Pollution

2.4.2 Environmental pollution

2.4.3 Harmful pollutants in air

2.5 Economic crises

2.5.1 Global trade Blockout

2.5.2 Damage to infrastructure

2.5.3 Increased Health care costs

2.5.4 Loss of productivity

2.5.5 Lack of Tourism Revenue.

(3)

Solutions (paragraph)

(4) Conclusion

4.1 Thesis restated, Summary of Ideas

4.2. Concluding Thoughts.

Introduction

Barack Obama Says "Climate change is no longer some far-off problem; It is happening here; it is happening now."

Climate change is a big issue in Pakistan. As per the worldwide climate index, Pakistan ranks 5th most vulnerable country to the impacts of climate change.

Climate change is also a global issue. Many countries of the world are facing its harmful consequences. The harmful causes of climate change in Pakistan are Deforestation, Burning of fossil fuels, urbanization and emissions of harmful gases in industries.

Date: _____

Day: _____

Moreover, population growth, Emission of gases from transportation and open Dumping of waste materials are causes of climate change.

Climate change affects us badly like Floods, Earthquakes or Droughts, Negative impacts on Mental health (Depression and Anxiety) and Rising of Sea levels, Increasing of global temperature. It also affects on Economy and Increase health care costs and lack of Tourism Revenues.

Climate change is not a new issue, Developed countries Overcomed it but developing countries are still struggling.
