

Pakistan's Economic Future - Can the Country Achieve Sustainable Growth?

Outlines

1) Introduction

Thesis statement: As Ben Ki Morn aptly said, "Sustainable development is the pathway to the future we want for all." Pakistan stands at a crossroads where sustainable growth is essential for long term stability. By implementing strategic reforms, Pakistan can transform its challenges into opportunities, paving the way for a resilient and sustainable economic future.

2) Understanding sustainable growth

3) Pakistan's Potential for Achieving Sustainable growth

3.1) Renewable energy transition

3.2) Optimizing natural resources

3.3) Green budgeting

3.4) Digital transformation

3.5) Human Capital Development

4) Obstacles hindering sustainable growth

4.1) Mismanagement of natural resources

4.2) Reducing overreliance on fuel imports

4.3) Cost of neglecting green budgeting.

4.4) Impact of limited digitisation

4.5) Challenges in Human Capital development

5) Bridging the Gap: Policy reforms and strategic interventions for sustainable growth

5.1) Implementing effective policies for resource management.

S.2) Strategic investment in Renewable energy

S.3) Green budgeting a catalyst for growth

S.4) Structural reforms to accelerate digitisation

S.5) Aligning Human Capital development with SDGs.

b) Conclusion
