(ii) Research in agriculture sector in order to eradicate the crop life diseases

G. Conclusion

Topic: An investment in knowledge
pays the best interest:

Education is the most powerful
weapon which you can use
to change the world. (Nelson Mandela)

Knowledge is a greatest driving
force that promote individual growth
and development. God create

human beings and bestow enormous
blessings like, water, Earth, Mountains and
various types of foods. along these
blessing Allah give humans spiritual

guideline, like the "Quran." Furthermore, the
first revealed of God by prophet
Muhammad (SAW) was about to

"Read." However, knowledge is that
power that illuminate individual
life as well as collective life.

It can alleviate poverty, ignorance
and deprivation by empowering
strong skills and intellectual growth

60

knowledge paved the way for individual upliftment as well as social growth and development. It create job opportunities, ~~and~~ offset social evils, economic growth, technological advancement, efficient health sector and increase the volume of agricultural production.

Starte with, how investment on education pays ~~the~~ best interest:
Before the advent of Qur'an in various civilization have no any strong guide line that guide them toward straightforwardness, those people indulge in various social evils, even they buried the female ~~a~~ new born children and intentionally deprived womens from their basic rights, however, after the revelation of the Qur'an ~~aim~~ eradicate all those social evils and promote equality among different factions

⑧

61

like "Ansar and Muhajee" further
- more knowledge create awareness
among different factions and
caste live with peace and
tranquility that promote their
well-being and social recognition.

In addition, education is an
important prerequisite for social
growth and development. It promote
individual well-being as well as
collective well-being. Education make
a person an able to raise his/her
voice about their due rights
and privileges in society and
able to think towards social
nourishment and development. An
educated person paved the way
for social growth and opportu-
nities that are fruitful, moreover, to
build a strong society. In short
we can say that investment
on knowledge have a significant
impacts on social growth and development.

30

Additionally, education widened the ways of nation building. The educated masses raise their voice in order to manoeuvre their due rights living in a specific territory. The skillful youth as well as women have a significant share in nation building. Furthermore, they make policies and strategies that are instrumental in nation building. The educated people pushed the government toward social development and promote brotherhood in a country and compelled the government to introduce transparent mechanism to run the state machinery.

It's also true that nourishment of education sector illuminate the hidden strength of individual growth and prosperity. Education open avenues for to an individual development toward greatness. Individual growth

and accountability ensure social wellbeing and development.

Furthermore, cultural diversity and accountability are an important characteristics of a civilized nation.

However, investment on education is an important strategy to acquire these characteristics. In today's, fast growing social development, cultural diversity and accountability are an important ingredients. To summarize investment on knowledge is a solid example of cultural diversity and accountability.

Moreover, it alleviate the root causes of social evils. Education campaign promote social awareness and compelled individual and the whole society to take decisive actions in order to eradicate the root cause of social evils and promote shared values in order to build a stable

etc.

80

society. Nowadays social evils are the strong hurdles in the way of social development and growth. In a nut shell investment on education eradicate the root causes of social development.

In addition, seeking knowledge balance or finished the religious and ethnic racism among and between different religious factions and ensure peace and tranquillity among different religious segments. However, in 21st century religious animosity and conflicts intensify the whole world, however education is the best instrument to offset these social and religious evils. Investment in knowledge not only limited to social demarcation it surround various important areas that are important the whole system function. One of this area is technological

upliftment.

Technology is the bedrock of economic upliftment, it plays universal role in health sector, economic and social sector. Its only function through a skilled human resource, however, investment in education paved the way for ~~tech~~ development. Japan and South Korea are the solid example of technological development, now Japan export 70% world advance technological equipment. In a nut shell we can say that investment in knowledge paved the way for technological development.

Secondly, it promote innovation. The skilled youth have the ability to maneuver its talent to introduce efficient equipment that compress the difficulties in various fields. One of the solid example we have the united states

: 65

silicon valley, now it innovate various technological equipment, modes, to strengthen its economic feasibility.

Apart from this investment in education: opened the ways for efficient the health sector, it strengthened the health sector to introduced various advance mechanisms that are instrumental to diagnose various disease like, the introduction of stethoscope, surgery equipments.

In a nut shell, we can say that investment in knowledge is also instrumental to the health sector.

Secondly, it produce efficient skillful human resources, that are harbinger in medical operations, like specialize personnel for each and every types of diseases.

— 20

Furthermore, investment in education, boost the agriculture sector tremendously. It introduce various resilient crops that increase the volume of production and fulfill domestic food demand as well as export other countries to maintain the Balance of payment.

Last but not least, education increase the effectiveness of various research department in order, to materialize the needs of people. Research in agriculture sector is useful to halt various microbial diseases, and introduce various chemicals to eradicate harmful insects. Furthermore it developed various methodologies in agriculture sector, like drip irrigation system, and various machineries that tenfold the volume of production.

In a nut shell, we can say that investment in knowledge pays best interest because, it promote social wellbeings, economic development and agricultural growth. It has multidimensional affects on individual and whole society, it has best leverages to religious harmony and tranquility. Furthermore, it has a potential to manifest social growth and challenge the emerging irregularities in society, like corruption, deprivation and taxism. Investment in knowledge pays the best interest because, it induce a concept of social mobility, unity and accountability.
