

DATE: ___/___/20___

Elon Musk, owner of the social media platform "X" accused the British-Pakistani community over the UK's past child grooming scandal. Cherry picking one community & making racial remarks can have dangerous affects. For example, when three little girls were murdered in Southport, disinformation was spread that the perpetrator was a muslim migrant. Though it was fake, but this rumour led to intense anti-muslim rioting. Elon musk dredge up the the Rochdale case and went after the british Paki community and British Prime minister was accused of covering up the matter. In this respect Foreign office has condemned the "racist & Islamophobic" narratives in the U.K. while calling out efforts to demonise the large & diverse british-Paki community. Meanwhile, it is dangerous when a man with obscene wealth & influence over social media chooses to make such hateful remarks. Therefore, It should not be done to demoralize muslims and those involved in the wrong doing should face law, regardless of their ethnicity or religious background.
