When the self-created conflict of Palestine was presented before United Nations for resolution then the United Nations, recognizing the rights of the Palestinian people to self-determination, itself proposed a formula for resolving the issue. A two state solution was proposed. But the UN resolutions were never followed for the past many decades. On the contrary, with America's support, Israeli forces are still active today. And they are playing with the blood of innocent Palestinians. And the area of Gaza has been completely destroyed in the war going on for the past two and half months. In this war, with American support, Israeli forces have brutally martyred more than 20 thousand Palestinian, including women and children. And for the survivors, there is no safe place left, and now, due to shortage of food and medicine, they are losing their lives.
