"Pakistan G100 : Shaping the Future" report by World Bank predicts that Pakistan can become a US \$ 2 trillion economy. Pakistan can also get status of "upper middle income country" where per capita income will be US \$ 5,700. This report highlights that Pakistan has immense potential to become a massive and self-sustaining economy. With, a population of over 240 million, abundant natural resources, and strategic geographical location, Pakistan holds a significant potential to emerge as upper middle income country. Sustainable economic growth refers to steady increase in growth and economic output without causing long-term harm to the environment, social structure, and economic stability. However, Pakistan has faced chronic issues such as trade deficits, political instability, inconsistent economic policies, which ~~has~~ have hindered the sustainable growth in Pakistan. Historically, Pakistan has relied on reactive and short-term policies to avert economic downturns rather than comprehensive and structural reforms. The periods of recent and short-lived economic growth such as, 2002-2007, 2014-2017, and 2020-2021, were merely driven by war on terror funding, Saudi deposits, and covid-19 emergency fund respectively. Nevertheless, Pakistan can achieve sustainable growth by employing comprehensive and structural reforms through industrialization, agricultural reforms, political stability, other reforms.
