Address the knowledge gap

Keep reading and writing

The future of energy is clean, renewable, and sustainable." (-Ban Ki-moon)

This quote means that

the future ~~will~~ depend

on clean energy like

the ~~sun, water,~~ solar wind, and

~~water, hydro~~ which are safe

and ~~never~~ run out.

Energy is very important

for modern life. It is

used in homes, transports,

and factories. But, today

the world is facing

a big energy problem.

Some people think energy

will never finish, but

this is not true. Oil,

gas and coal are

~~using~~ ~~too~~ much, and

they are ~~finishing~~ running out. The

clean energy, like wind
