The world is seeing the ~~A~~ rise in climate change. This ~~rise~~ of climate change is affecting the developing countries. and Pakistan is one of them. The extreme temperature is affecting the educational sector which leads to closure of educational institutions. Study of students ~~are~~ disrupted by this unprecedented climate events. Firstly, it was Covid-19 which forced ~~the~~ students out of school now it's climate change. It is worrisome as climate change is directly affecting the young generation and ~~nobody~~ is talking about it. In COP29, education was ~~nowhere~~ mentioned in the meeting. This issue needs to be addressed and ~~prudent~~ measures needs to be taken. Solving this problem requires more than air conditioning. Climate resilient architecture, robust remote-learning system and teacher learning in climate education are essential.
