The World Community is astray today, just as it was after the Great War in 1945. There is ^{so much} that is crumbling apart, no state or leader can decide what issue to prioritise in order to resolve them. The need of the hour is active involvement of UN in the affairs of the world. Current scenario requires united Nations to emerge and administer in all its glory. With global peace and prosperity its central objectives, the international organisation is required for ensuring effective negotiations related to various matters. In lieu of rising authoritarian governments, UN action is required. It is necessary that UN intervenes in hot conflicts for peace and resolution of conflict. The lingering evil of climate disasters requires immediate and efficient response from United Nations. Prevailing

Structure Strong, Coherent Paragraphs

- Start with a clear topic sentence: Each paragraph should begin with a sentence that introduces the main idea or argument. This gives the reader a clear understanding of what that paragraph will discuss.
- Support your ideas with evidence: After the topic sentence, provide examples, facts, or reasoning that support your argument or claim. This makes your paragraphs more substantive.
- Use logical flow: Organize your ideas logically. Start with a general statement, then follow up with details, evidence, and examples. End the paragraph with a sentence that summarizes or transitions to the next point.
- Ensure paragraph unity: Every sentence in a paragraph should relate to the main idea. If a sentence doesn't serve the paragraph's purpose, either revise it or move it to another paragraph.

post COVID-19, the UN needs to address them collectively. It is evident that world leaders, population and system of administration requires supervision by the United Nations more than ever at present.

The United Nations has always been politically engaged. In most cases, the ruthless states have been civilized by it. Presently, the global community suffers from extensive increase in totalitarian governments that are imposing harsh policies against public good. UN is required to hold negotiations or make them accountable. The case study of Myanmar (former Burma) is notable in this regard, where UN intervened to bring

democratic reforms. Present states like North Korea must be included in world Affairs by active engagement at UN General Assembly Sessions.

The globe is facing wars and violence today. Major countries are conflict prone zones. United Nations is needed to bring about peace and halt violence. UN is required to hold effective conflict resolutions and deployment of peace-keeping missions in order to uplift the status of human lives and address the present humanitarian crisis that has engulfed the global community. Notable examples include genocide in Gaza, where over 50,000 casualties have been reported or the war in Yemen, even stalemate in Ukraine. Such conflict jeopardize the normalcy of life in the major areas and require collective response.

The most-hyped issue of present decade is climate change. The rising global temperatures and melting glaciers are talk of every town. The International Community looks towards the United Nations to handle this evil. This problem not just demands UN attention but also immediate action. The UN Framework Convention on Climate Change issues quarterly reports that are alarming, like the recent one on Kiribati's existence threat. Such extensive research along with immediate guidelines and action

Improve Word Choice

- Be precise: Instead of using vague or general words, choose words that are more specific and descriptive. For example, instead of saying "good," say "effective," "efficient," "outstanding," or another word that better conveys your meaning.
- Avoid repetition: Repeating the same word or phrase too often can make your writing monotonous. Use synonyms or restructure sentences to keep the language fresh and dynamic.
- Consider connotation: Pay attention to the emotional undertone of words. Words carry connotations beyond their dictionary definitions, so choosing the right word can make your writing more compelling.

regional and even state levels.

The rise of terror-related attacks and other forms of organized crimes like drug or human-trafficking, smuggling or terror financing require sole attention of UN. It has been reported by UNODC, an organ of UN itself that 17% more terrorist incidents were observed in 2024. The response, both apt and effective, of UN officials is mandatory today.

Hunger and Poverty

have struck global community harsher than ever before in this decade.

Global conflicts are a surge and lead to decline of justice. War criminals are left free to do as they please. The United Nations is required to ensure the provision of justice to war criminals and create an aura of accountability and rule of law. Organs of the UN like the ICJ and ICC are essentially needed to ensure that justice prevails in a class-divident society of 21st century. The trials and orders of arrest issued against President Putin and Netanyahu by the International Criminal Court validate that UN holds a central role in maintaining justice for all.

~~result in large number of displaced people and refugees with increasing incidents of war. the number of refugees has sky rocketed too.~~

It is only possible to address and facilitate such a huge refugee population by the UN effective policy. The task is not merely confined to repatriation of refugees but it also involves ensuring their well-being and sustenance. The United Nations Refugee Works Agency (UNRWA) is a dedicated organ that serves this purpose.

The provision of clean energy is halted at present. There is not enough fossils to generate energy that fulfills human needs. The services of UN are required to devise a dual-efficient sort of policy: ~~one that fulfills human energy requirements along with~~

environmental sustenance. The current UN SDG Goal-7 revolves around provision of adequate amounts of clean energy to the world. The fulfilment of UN Goals at this point in time are crucial for global community.

Blue Gold Crisis is another imminent issue of current global affairs. Water access and shortage are core of food insecurity. In the present scenario, where an alarming surge in population of the world is witnessed, it is crucial to involve UN and devise a comprehensive, long-term mechanism that could cater water requirements of an ever-growing population. The UN SDG-6 revolves around provision of ample and clean water. It is crucial that UN strives to attain these goals in an attempt to address current crisis.

The incumbent era is marred by nuclear advancements. States are trying to extend their nuclear arsenals and war-heads. UN is required to address this destructive threat to global peace by adopting a non-partisan yet comprehensive strategy. The IAEA that operates under the umbrella of UN is the only authority capable enough to manage a nuclear fiasco. It is time, UN works to stop the nuclear advances of Iran, Israel and others. The global community is glued on UN for an effective solution.

On the contrary, it is never advised to abide by a monotonous system that has depicted various failures over the years. The current scenario is a replica of events and there is a probability that the

world can deal with it without effective UN involvement.

Recent conflicts triggered hostilities of powerful states towards the weaker. The UN played a mere lip servicing role but took no real actions to halt the inhumane advances. One such scenario is the revocation of article 35-A and 370-A by India in Kashmir. The UN did little to counter the offense.

Partisan role of a global organisation does more harm than good. The UN has allegedly been nothing more than a propagator of western agendas. Certain actions of the UN are a depiction of its biasedness. For instance, UN in general and IAEA in particular heavily sanctioned Iran on proliferation issue but turned deaf ears to

Israel's nuclear programme. Such scenarios are perplexed to comprehend but create mistrust.

In Summary, it is evident that current global scenario requires the undivided attention and focus of the United Nations. It is only possible to overcome the current challenges by uniting against them, adopting a single policy that has been collectively devised by the global community. These include effective justice provision mechanisms against heinous criminals. It also addresses the need to rehabilitate large numbers of displaced persons due to conflicts or the climate. The adequate supply of clean energy also requires the efforts of UN. Only the UN can administer water issues
