

AI will replace human jobs: Blessing or curse?

I Introduction:

AI is blessing for humanity in a way that it would transform the job industry by creating new jobs, aiding individuals in their jobs and transforming the industry for better.

II Artificial intelligence is a blessing for humanity.

1. AI would create more jobs
2. It would aid people with their jobs
3. AI can not completely fulfill the requirement of being creative and wise in job
4. Job done by AI would be error free
5. AI would complete tasks more time efficiently
6. Repetitive & tedious tasks can be done by AI, saving person's time
7. AI would increase productivity in job
8. Dangerous jobs can be performed by AI

9. AI can work around the clock.

II. ~~AI is a curse: a misconception~~
~~to be ready~~

III. AI is a curse: a misconceived notion.

1. AI would dominate job industry.
2. AI would cause massive unemployment.
3. There is still long way to go for AI to be accepted widely.

IV Conclusion

Why writing in would form

AI has already tae
AI has already taken its stride
