

Reforestation as global Urgency.

Outline

Introduction:

Reforestation is a global Urgency:

- i) Mitigating the impacts of climate changes;
- ii) Regulation of water cycle;
- iii) Preventing from soil erosion;
- iv) Ensuring long-term environmental sustainability;
- v) Decreasing the emission of CO₂ in the atmosphere;
- vi) Reducing the uncertainties of food insecurity due to harsh weather conditions;
- vii) Preventing from biodiversity loss.
- viii) Mitigating the impacts of air and noise pollution;
- ix) Enhancing the natural beauty and charm of the world that has been engulfed due to industrialization;

x) Reducing the uncertainties of natural disasters;

xi) Neutralizing the temperature of earth due to global warming;

Measures to ensure reforestation:

i) Raising awareness about the importance of trees among individuals;

ii) Promoting plantation of trees at local level;

iii) Allocating a small package/Budget for plantation;

Conclusion:
