:とった TOPIC: DIGITAL DEMOCRACY IN PAKISTAN: OPPORTUNTIES AND CHALLENGES Outline (A) Introduction Thesis Statement: Digital demociacy presents significant opportunities for political participa-Paristan but also poses challinger -tion in that need to be addressed. (B) Understanding Digital Democracy B.1) Digital democracy repers to the use of digital technologies in political processes, including governance, elections, and citizen participation.

ちょ According to Pew Research Center, in 12 out of 19 nations, adult aged 18 to 29 betweene that social media has been good for demociacy). (B.2) The rise of egovernance, social media activism, and online political discourse presents both apportunities and challenges for Pakistan. (C) Opportunties of Digital Democracy in Pakistan. (C.1) Increased political participation as it provides a vast platform for political engagement, debates, and awareness. PIDEA: Over 71 million Pakistanis use Social media. (C.2) Digital democracy. enhances Government transparency and accountability Online portals like "Pakistan Citizens Portal

210 allow citizens to report grievances directly to the government). (C.3) Digital democracy provides women, rural populations, and religious minorities a space to voice their concerns. (Initiative like "she votes" encourage women's political participation, reducing gender gaps in democracy), (C.4) Digital voter registration and election monitoring reduces electoral fraud and maynactice. ( ECP has introduced online voter registration, reducing election fraid and increasing accessibility). (C.5) Automation reduces corruption and improves eppiciency in public service delivery ( Government's intratives like NADRA's digital ID verification and online tax filing simplify bureauciatic processes.)

1.3 (C.6) Digital democracy in Pakistan helps in boosting one-on-one interaction among leaders and the masses. (The enhanced usage of Twitter accounts by the leadens, like all Paustan's upplitical parties' promiment leaders, showing their online presence, helping them disseminate their parties' ideology among the masser. (C.7) Digital placforms can provide citizens with easy access to information about government policies, law, and services, empowering them to make informed decision. (D) Challenges of Digital Demociacy in Pakistan (D.1) Unequal access to the internet and digital devices, particulary in rual areas, limits the inclusivity of digital democracy.

According to PTA, only 361. of Pakistan's. 313: population has access to internet, with rural areas significantly lagging behind Unban centres). politan shi tha (D.2) The risk of cyberatlacks, data breaches and hacking poses a significant threat to the integrity of digital demociacy. According to Pakistan CERT, in 2021, Pakistan experienced a 70% increase in upberatiacks, highlighting vulnerability à digital infrastructure) a hard an ed. (b) when a second and D.3) The spread of misinformation and -fake news on digital platforms can manipulate public opinion and undermine the credibility of democratic processes. Dr. Zapar Kom Sapdar: In Pakistan, fake news often takes the form of manipulated images, headlines that are misleading, and pabricated stories that are aimed at misleading the public for social, political, and economic gains).

どって (P.y) Lack of palitical will and bueaucratic hudles can show down the implementation of digital initiatives. The ECP has yet to develop robust legal framework for online voting and political advertisements. (D.S) Female politicians and activists face cyberbullying and threats, discouraging their digital participation. According to digital rights foundation, women in politics pay a higher price as compared to men, especially when it comes to online trolling (Ammesty Internati-- onal, 2018) D.6) Existing laws may not adequately address issues such as online housassment, digital rights, and the regulation of social media platforms. Pakistan's Personal Data Protection Bill has been in works since 2018 but has yet

210 to be passed, leaving gaps in data privacy and cyber sacurity regulations: Ministry of IT and Telecom D.7) Frequent power outages and internet connectivity, especially in rural dreas, hinder the adoption of digital tools. Pakistan ranks 76th out of 100 countries in the inclusive internet Index: Economist Intelligence Unit 2012). E) Conclusion
