

Title :

# Science and Technology: The ability of man.

People have doubt whether it is within the power of science, ensuring over a prolonged period of freedom from destitution ~~from~~ <sup>for</sup> mankind. Moreover, in the race between increasing population and augmenting, population must eventually win. Those who decline to hold this pessimistic view recognize the hardship of practical problem of meeting needs of increasing population. Subsequently, a similar rapid change is likewise occurring in thinking of masses of people. This change is due to the experience of technology and education. And, long future depends on a growing understanding of man in science and technology. The fact is that widespread thought is being to such problems by persons whose thinking is educated to rely on reason. Similarly, such understanding of human goals and development of morals can be achieved before forces are seen. Therefore, man's ability is <sup>to</sup> solve this ethical problems.
