## Precis of Past Paper P&C (2018)

Q<sup>2</sup> - write a precis of the following passage in about 120 words and also suggest a suitable title:-

It is in the temperate countries  
----- minds and bodies.

### Precis:-

Title :<sup>6</sup> The Impacts of Climate  
On Humans'

A cold climate serves as a hurdle for humans which resultantly makes them inactive. A moderately cold climate provides refreshment along with the harshness of weather where a man has to do some arrangements for getting warmth. Consequently, he has to get good nutrition to recharge himself. Overall, a strong effort is required by humans

to survive in cold weather. On the other hand, a hot climate brings laziness in human beings where they do less exertion. Besides this, a tropical climate provides solace, less need for nutritional intake without much struggle for the long day. In short, humans are adaptable to different climates on Earth
