(2002 - 2022)

CSS 2002

The official name of our species is Homo Sapiens; but there are many anthropologists who prefer to think of man as Homo Faber — the smith, the maker of tools. It would be possible, I think, to reconcile these two definitions in a third. If man is a knower and an efficient doer, it is only because he is also a talker. In order to be Faber and Sapien, Homo must first be loquax, the loquacious one. Without language we should merely be hairless chimpanzees. Indeed we should be something much worse. Possessed of a high IQ, but no language, we should be like the Yahoos of Gulliver's Travels — creatures too clever to be guided by instinct, too self-centered to live in a state of animal grace, and, therefore, condemned forever, frustrated and malignant, between contented ape-hood and aspiring humanity. It was language that made possible the accumulation of knowledge and the broadcasting of information. It was language that permitted the expression of religious insight, the formulation of ethical ideals and the codification of laws. It was language, in a word, that turned us into human beings and gave birth to civilization.

(191 words)

Solution

Importance Of Language

Human are known as both homo-sapiens and homo-faber but, their both traits of knowing and efficient doing is because of their language. Through language they can deliver their ideas and can share their experience. Without language human will be the worst creature of world who knows alot but unable to share their knowledge. It's a language who help human beings to give birth to civilization.
