

AI in education : Opportunities and challenges

Outline

1. Introduction

Thesis statement : The integration of AI in education is perceived as dual-edged sword as it has promised uplifting of educational system. Whereas, certain challenges loom around.

2. AI in education : an overview

3. What are promises of integrating AI in education?

a. Provides personalized learning experiences

- Dreambox and smart sparrow

b. Simplifying complex tasks creates ease for learners.

- Smadon - applocation

c. Automating administrative tasks increases productivity.

- Gradescope - grading tool

d. Tools of modern nature ensures educational accessibility.

- speech to text - students with disabilities

e. Self-evaluation mechanisms creating progressive ambience

- Grammarly

f. Unbiased academic knowledge promotes inclusive society

g. Predictive analysis assisting students at the most

- Knewton

h. Virtual learning forums providing ease in conducting experiments.

- Labster

4. What are pitfalls of integrating AI in education

a. The looming threat of data

privacy and security

- 'Help me see' app in uni of Alicante
- b. Inculcated bias in AI algorithms threatens productivity
 - smart sparrow
- c. Heavy cost of implementation: an impediment in integration
 - OAK academy in UK struggled.
- d. Unrealistic ideas widening the gap of education and job market.
- e. The existential threat of super intelligence may lead to destruction of young minds.
- f. AI in education: Invoking existing socio-economic inequalities
- g. Idea will lead to mass job displacements.
- h. Robotic teachers lacking emotional intelligence will lead to

uninteractive learning

5. What are pathways to strike balance between challenges and opportunities?

a. Implement robust governance measures to avoid data risks

b. Incorporate explainable AI models to avoid ethical concerns

6. Conclusion

A visually impaired kid striving to learn eventually lands before the tool of artificial intelligence that has provided ease in provision of educational rights. The integration of AI in education has not only provided personalized learning experience but it has simplified ~~creates~~ complex tasks.

From automating administrative tasks to ensuring accessibility,

From providing unbiased academic knowledge to providing virtual learning platforms,

AI has emerged as blessing for educational framework. On the contrary, the looming threat of data privacy and hefty cost of implementation has made AI a distant dream in education. Besides that, the lack of emotional intelligence in machines, the existential threat to

employment, and inevitable
pitfall of 'superintelligence'
has invoked the debate of
ethical dilemmas attached
to it. Nevertheless, the
integration of AI in education
is perceived as dual-edged-
sword as it has promised
uplifting of educational system.
Whereas, certain challenges
loom around.

To conclude, the integration of AI in educational system is perceived as dual-edged sword as it has promised uplifting of educational system. Whereas, the challenges loom around. In essence, integration has borne fruits by providing personalised learning tools, self-evaluation mechanisms, and by ensuring accessibility to all.

Whereas, the idea of biasness, development of super intelligence, hefty cost of implementation persists. It has not only widened the existing socio-economic inequalities but led to mass job displacements. Now the onus lies on state to ensure ethics, rights and liberties, while implementing AI in educational sector.

The future of globalisation in the face of populism

Outline

1. Introduction

Thesis statement: The future of globalisation remains bleak in the face of populism as prefers regionalism over globalism, rhetoric over strategies, ethnicity over plurality, and authoritarian tendencies over democratic freedom.

2. Globalisation and populism :
understanding the nexus
between both

3. How future of globalisation
appears to be bleak in the
face of populism?

a. Xenophobic ideologies of
right-wing populist undermines
idea of plurality.

b. Populists turn a blind eye to
multilateral agreements threatening
global environment

c. Immediate cures over seeks
regionalism over globalism

d. Whims-driven economy of
nation threatens global economy.

e. Enforcement of political
patronage fosters global
incompetence

f. Constraints on press by populist
leaders lead to cultural
dormancy

g. Employing rhetorics to global
conflicts deepens polarisation
of global political arena

h. Paying lip service to nationalism
undermines the strategic

Depth of nation

4. How future of globalisation appears bright in the face of populism?

a. Transient grievances leading populism may end by global sentiments.

b. Prevailing idea of xenophobia aligns with ~~to~~ right-wing populists.

c. Regionalism eventually drives the way to globalism

5. How globalisation can flourish amid rising trend of populism?

a. Foraging norms to deter populists' driven economy

b. Viable solutions to global

conflicts will serve the purpose

c. Shunning identity politics will foster inclusivity

d. Bridging democratic deficit will promote globalisation

6. Conclusion
