

... society and its members acquire and maintain integrity/ professional profundity in their endeavors. ... certain so called beliefs, aspires people for ... human behaviour, ... and induces sense of discerning right from wrong.

Title: University Education: Its Scope and Objectives

CSS 2002

Q1. Make a précis of the given passage, also give a suitable heading":

(20)

"The official name of our species is homo sapiens; but there are many anthropologists who prefer to think of man as homo Faber-the smith, the maker of tools. It would be possible. I think, to reconcile these two definitions in a third. If man is a knower and an efficient doer, it is only because he is also a talker. In order to be Faber and Sapiens, Homo must first be loquax, the loquacious one. Without language we should merely be hairless chimpanzees. Indeed we should be something much worse. Possessed of a high IQ but no language, we should be like the Yahoos of Gulliver's Travels- Creatures too clever to be guided by instinct, too Self-centered to live in a state of animal grace, and therefore condemned forever, frustrated and malignant, between contented ape hood and aspiring humanity. It was language that made possible the accumulation of knowledge and the broadcasting of information. It was language that permitted the expression of religious insight, the formulation of ethical ideals, the codification to laws. It was language, in a word, that turned us into human beings and gave birth to civilization.

Précis:

Man has been considered as the knower (Homo Sapiens) and the maker of tools (Homo Faber). To fuse these two definitions...

turned human ~~into~~ gave them civilization.

Precise 2002

Language: cause of civilization.

The official name of humans is homo sapiens but most anthropologist refer them as homo faber - the smith. For humans to be knowledgeable and efficient does and he must know language. It is language that differentiated man from animals, enabled them to collect and share information, formulate religious and moral ideas. simply put, it was language that turned animals into humans and gave birth to civilization.
