

# Artificial Intelligence : The Death of Creativity

## Outline :

### 1. Introduction

(Thesis Statement : With the Proliferation of AI as an emotional companion, co-pilot for decision making and conducting academic research, and the risk it poses to human uniqueness by replacing creativity-demanding jobs, showing lack of empathy in social interaction or by limiting the possibility of human exploration, it can be fairly deduced that Artificial Intelligence has indeed caused the death of creativity.)

### 2. Understanding Artificial Intelligence

#### A. Definition and Types of Artificial Intelligence

(The rise of Generative Language based AI model such as ChatGPT)

#### B. Prospects for the Future of AI

(Google CEO, Sundar Pichai comments on Artificial Intelligence)

### 3. Facts highlighting that AI indeed has caused the death of Creativity

A. Proliferation of AI as an emotional companion

(Apps like "Replika" and "Character.ai" have potential to replace human emotions)

B. AI as a co-pilot for National Security Decision Makers

(Recent, "Wargame" experiment conducted by a team of OpenAI)

C. Potential of AI for replacing Jobs which solely rely on Human Creativity

(Jobs like Musicians, Composers, directors and Producers as highlighted by Yuval Noah Harari in his book: 21 lessons for the 21<sup>st</sup> Century)

D. Role of AI in the Future of Academic Research

(Tools like "NotebookLM" making literature review efficient yet ineffective)

E. AI's role in limiting the possibility of Human Exploration and Learning  
(Studies shows that children learn more through exploration rather than tailor-made information)

F. AI's amorality and lack of Empathy poses risk to human relationship  
(Recently, an AI advised a 17 year old to kill his parents shows the vulnerability of AI)

G. AI Generated content makes Artists around the Globe feel insecure.

#### 4. Recommendations for Balancing AI and Human Creativity

A. Preventive Regulation of Artificial Intelligence by Governments.

B. General Awareness among Masses about AI to make sure people do not feel alienated

#### 5. Conclusion
