

Modifying a successful universal education  
Present system of education is to  
stress and less learning activity  
child is not encouraged to discover  
his intellectual independence. He has  
reluctantly by dint of brute repetition  
quite naturally the child being bored this  
type of education system. Therefore child  
moral as well as intellectual independence.  
The main defects in the current system of education  
is unsound methods of teaching. They need  
new system of universal education which  
itself so successful and suitable for India.
