2. How Indian sub-continent was the	
food supply basket fox the British:	1
this part is not required. so keep it very brief.	
2.1. Ancient Innovation:	
•	
Indus valley civilization establish early techniques like canals and wells.	
techniques like canals and wells.	
This tradition continued from early	
empires like Mughal empire, who	
significantly expanded irrigation system	
in sub-confinent.	
2.2. British Colonial Exa:	
Delet Office to the terms	
British Administration Joanatically enhances	
irrigation system in sub-continent from	
18th to early 19th century. They constructed	
canal networks particularly in Panjab, and	
uttax pardesh. By 1947, irrigation system expanded significantly resulting in cash	
crops like opium and cotton for export.	
But now, Pakistan has to impost hod	
Commodities.	
- "Pakistan is the largest	
imposter of cotton	
from USA."

BOOK TO A STATE OF THE STATE OF		
	3.1. Lack of Water:	
	Water sacrify is the major problem of	
	agriculture sector. Pakistan use to have	
	to much water but now, Pakistan	<u></u>
	is facing significantly shortage of water,	
	leading to Sectine of agriculture sector.	
	The ravi sives was the backbone of	
	form land because, it helps 90% of coop ?	
	growth.	
	Pakistan's water availability	
	Per capita has disposed to	
	approximately 1,017 cubic meter	
	as of 2023, classifying the	
	country as water-stressed.	
	Tipe Clicioner in ixrigation systems	
	Thefficiency in irrigation systems  sesult in only 30% of water	
	reaching farms."	
	ocacing family.	
	- Indus River System Authority (IRSA)	
	Will coming	
- ut	3.2. Climate change:	
	Climate change is also a major reason	
	of Sectine in agricultural a sector because,	
	weather of Pakistan hanges unpredictably	
- Control of the Cont	leading to rain when it is not necessary	
	causing low efficiency in agriculture sector.	

	3.4. Reclamation and drainage:	
	The state of the s	
	Saltiness and standing of water, which	
	is eqused by poor drainage, making	
	is eqused by poor drainage, making it hard for the land to produce	
	crops. According to the Research Grate,	1
	Pakistan's exop production has dropped	
	by 25% because the land is too salty.	
	add more arguments in this part.	
	4. Solution to Agriculture Decline:	
_		
	Modesnizina & Addressing lack of water:	
	Traditional way: by using wate-saving methods	
	Providing modern like drip and sprinkler systems,	
	tools and training collecting and storing rain water	
	farmers on new for farming we can address	
	techniques can improved this issue.	
	farming Solutions	
	7	
	Improving Reclaimation Combating Climate change	2:
	and Drainage: To combat climate change,	
	salty and damaged farmers can plant crops	
	Soil can be fixed that can survive extreme	
	by using simple weather and set up warning	
	materials the like systems that can warn	
	bypsum or lime, while farmers from bad weather	
	drain can be built to	
	remove extra water	
	from fields. discuss this part in detail by giving s	<u>bheadings</u> .
