

3. What agencies does Nature use to change the appearance of the earth ?
4. Of all the forces of erosion, which one is the most powerful?
5. Suggest a suitable title for the passage

EXERCISE No. 19

The year 712 A.C. is a great landmark in the history of Islam. Only eighty years had passed since the Prophet's death and the boundaries of the Islamic World already stretched over three continents. In this year three young generals won great renown for themselves and everlasting glory for Islam. Muhammad Bin Qasim conquered the north-west of Indo-Pak subcontinent ; Qutayba swept over the Central Asian plains and Tariq Bin Ziad annexed Spain. This was the farthest reach of the Universal state that the Muslims founded. It was not mere conquest of one people by another; it was the inter-mingling of races, of cultures, of the human mind and out of it was born a civilization which kept the world enlightened for nine hundred years. It was from the Muslims that Europe learnt new techniques, new science and civilization ways. The Arts of Islam have left a mark not on rocks and stones but on the minds and imagination of the whole human race.

Questions :

1. What made the year 712 A.C. important in Muslim History ?
2. To what extent did the boundaries of the Islamic World stretch only eighty years after the Prophet's death?
3. What was the special feature of the Muslim Civilization?
