Outline

I. Introduction

(a) Hook

(b) General sentences

(c) ~~Causes~~ Thesis statement: Pakistan

~~is~~ is facing a serious

water crisis due to

lack of dams, wastage of

water resources, irregular

irrigation systems, high dependence

on Indus river system,

climate change, backward

agriculture techniques, and

it can totally change

the future of Pakistan

affecting its economy, health

sector, relations with India,

Relations among provinces, Environment

and very life. Thus immediate

efforts are required to

address the escalating

Issue.

II. Causes of water Crisis in Pakistan.

1. Lack of dams

(a) Existing dams and storage capacity

(b) Dams under process and capacity

Date: 1/20

Page: 10

2. Poor Irrigation Systems

- (a) Water wastes in canals
- (b) Irregular tube wells
- (c) Water management.

3. Climate change

- (a) Pattern of rainfall
- (b) Floods
- (c) droughts

4. Poor Agriculture methodologies

5. Dependency on Indus River System

6. Wastage of water

- (a) Domestic wastage
- (b) Rain water
- (c) Glaciers melting wastage.

II. Consequences of water crisis

1. Economic drawback.

- (a) Reduced crop production
- (b) High prices for electricity
- (c) Unemployment

2. Health issues

- (a) Under nutrition
- (b) Diseases
- (c) Life vulnerable.

3. Environmental issues.

Date: / / 20

Day: M T W T F S S

- (a) Wet Dry weather
- (b) Unpredicted seasonal pattern
- (c) Barren lands
- 4. Relations with India
 - (a) being a low stream country their might be
 - (a) War threat
- 5. Relations in between provinces

IV. Way forward

V. Conclusion.

The Essay

"Is Pakistan destined to become a desert nation? The answer lies in how it addresses its escalating water crisis."

Pakistan's storage capacity of water is not increased. The population of the country is growing rapidly, and it is estimated that it will become difficult to

Date: 1/120

Day: MTWTFSS

meet the water requirement the end of 2035. The country is facing serious water crisis due to lack of dams, poor irrigation systems, climate change, poor Agriculture techniques, High dependency on "Indus river system" and wastage of water, and these will have serious consequence for the economy of the country, Environment, health sector, Relations with neighbour rival country India, and in between the provinces as well. Hence immediate worthy steps are required to address the escalating water crisis in the country to shape its bright future.
