## Sanctions on Iran

Currently, Iran is facing worst economic crisis. Economic Crisis in Iran are due to United Nations sanctions on Iran. UN and USA imposed sanctions on Iran which has been causing crisis in Iran. Iran is in isolation because of these sanctions. Sanctions means to prevent any country from international trade. This is the reason that Iran is despite having large ~~natural~~ gas and oil resources still facing many humanitarian and economic crises. The main reason of sanctions on Iran is linked with its nuclear Programme. World imposed sanctions on Iran just because Iran is trying to develop nuclear weapons, and United Nations want that Iran must stop its nuclear activity. The another main reason of sanctions on Iran is that, Iran has been in hostile relations with Israel and USA since 1979 revolution. These sanctions have negative effects on Iran's economy and its development.

UN and USA have imposed sanctions on Iran because of its hostile actions against Israel and Uranium Enrichment programme; these sanctions have prolong impacts on Iran's economy.

One of the main reasons of sanctions on Iran is that Iran is trying to develop nuclear weapons. Nuclear programme means the enrichment of Uranium. Iran is a signatory to the non-proliferation treaty, according to which Iran is bound to follow the principles of the treaty, and to not make efforts for the development of nuclear weapons. Thus the nuclear programme of Iran is the main reason of sanctions on Iran.

Hostility towards Israel and USA is the another main reason of sanctions on Iran. Iran has hostile relations with Israel and USA since 1979. Iranian people have anti American and anti-Israel sentiments. Iran has also been engaged in war with Israel many times.
