1. Reforestation is a global urgency

Introtuction:

According to Founder of Arbor Day, Julius Sterling Morton, "Each generation takes the earth as trustees. We ought to bequeath to posterity as many forests and orchards as we have exhausted and consumed." The best way to mitigate climate change is the plantation of losted forests. Global urgency is a situation or issue that requires immediate and coordinated international attention and action due to its potential to significantly affect the entire world. Reforestation is a global urgency to understand the core concept and importance of plantation. Moreover, the global trends of reforestation are also its gloal urgency. Furthermore, the loss of biodiversity of both plants and animals needed the global urgency of reforestation. Reforestation is a global

urgency due to various causes of deforestation which leads to severe damage to forests. In addition, various socio economic consequences of the deforestation ultimately needs the global urgency of reforestation. The preventing of climate change is only possible by the global urgency of reforestation. Humans faces alot of problems due to decreases in level of oxygen which could be reversed by the global urgency of reforestation. Therefore, avoiding deforestation and reforestation is a global urgency.

Conclusion:

It is concluded that reforestation is a global urgency due to various aspects and facts. Reforestation is the major strategy and solution of the climate change which creates abnormal situations. Moreover, it is not only a preventive measure but alot of Socio-

economic benefits too. The international organizations such ^{as} UN and various more play their greater role in the urgency of reforestation. The China's Green Great Wall, Brazil's Amazon Restoration and Rwanda's agroforestry model are some of the global problems examples of the global urgency of reforestation. The various barriers to reforestation creates a lot of hurdles and problems which needs its global urgency. Moreover, the use of technology such as drones, satellite monitoring and genetic engineering of resilient tree species are some of the strategies that need the global urgency. The government needs to implement strict rules to cover forests. Peoples are needed to be aware of the importance of forests and plantation. Everyone in the world should take its own responsibility to avoid cutting trees and plants.

2. Hamas - Israel conflict : A test case for world conscience

INTRODUCTION:

According to Aeschylus, Ancient Greek playwright "In war, truth is the first casualty". How in times of conflict, misinformation, Propaganda and emotional narratives often replace facts - a reality very visible in the Hamas - Israel conflict, where competing narratives and media bias shape global perceptions. A conflict refers to disagreement or argument, typically a protracted one. The historical context of Israeli occupation and mass killing of innocent Palestinian civilians are a test case for world conscience. Similarly, siege of Gaza, deepening humanitarian crisis and violation of UN resolutions, international law is the test case for world conscience. Similarly, the

global response to Ukraine and Palestine reveals hypocrisy which is a major test case for world. Moreover, the biased role of Western media is the test case for world too. Furthermore, the weak and divided stance of the Muslim world is also a greater test case for the world conscience. The inaction of international criminal justice mechanisms and framing of the Palestinians resistance as terrorism is the test case for world conscience.

Therefore, Hamas-Israel conflict is a major test case for world conscience due to multiple perspectives.

CONCLUSION:

The Hamas-Israel conflict is a test case in many ways and perspectives for global conscience. The selective outrage by human rights organizations and unconditional

Western political and military support for Israel is a test case in promoting justice and equity. Furthermore, the failure of international diplomacy and peace efforts are a test case for world conscience.

Moreover, the impact on global youth and public opinions show disconnect between people's conscience and state policies. In addition, the moral

consistency in global leadership is also the major test case for world conscience. Similarly, the mass killing of Palestinian and deepening humanitarian crisis raises moral

questions. Hence, the two-state, international mediation and diplomacy;

should improve and facilitate Israel's

and Hamas. The End of Gaza Blockade, ceasefire and demilitarization agreement

can prevent the conflicts between

Israel and Hamas.

3. An investment in knowledge pays the best interest.

Introduction:

According to Socrates, "The only true wisdom is in knowing you know nothing." It remind that real knowledge begins with realizing our limitations. If person do not realize his limitations, he cannot remind the real knowledge. Knowledge is the understanding, awareness or familiarity gained through learning, experience or study. It includes facts, informations, skills and wisdom that a person acquires over time. The knowledge is something which is not consumed like wealth but it grows over time and continues to benefit the individual and society. An investment in knowledge results in the foundation of personal growth. Moreover, better career opportunities

and economic prosperity is only possible due to investment in the knowledge. Moreover, an investment in knowledge is the best way to eradicate poverty from society. Similarly, through knowledge and education, social awareness is created and citizens become the responsible ones. An investment in knowledge also improves the quality of life. Therefore, an investment in knowledge pays the best interests.

Conclusion:

An investment in knowledge results better which improves overall life quality of a person. An investment in knowledge do not diminish like material things but it benefits the person's throughout life. The investment in knowledge make the society and individuals to respond quickly with wisely decisions at

at time of crisis like pandemics and diseases. An investment in education makes the individuals of society of being able to drive innovation and technology. It enables the people to live peacefully with tolerance and ~~purpose~~ purposeful life. Moreover, knowledge and education leads to global respect and leadership. Furthermore, it is the only legacy, by sharing of it provides more benefits. Knowledge is the only weapon against dangerous situations which can safeguard the people everywhere. It is responsibility of the government to spend more and more on education. Media should play role in exposing the cultural barriers in education. Moreover, public awareness about education and implementation of strict policies can improve more education systems.
