Topic : Reforestation as a Global Urgency.

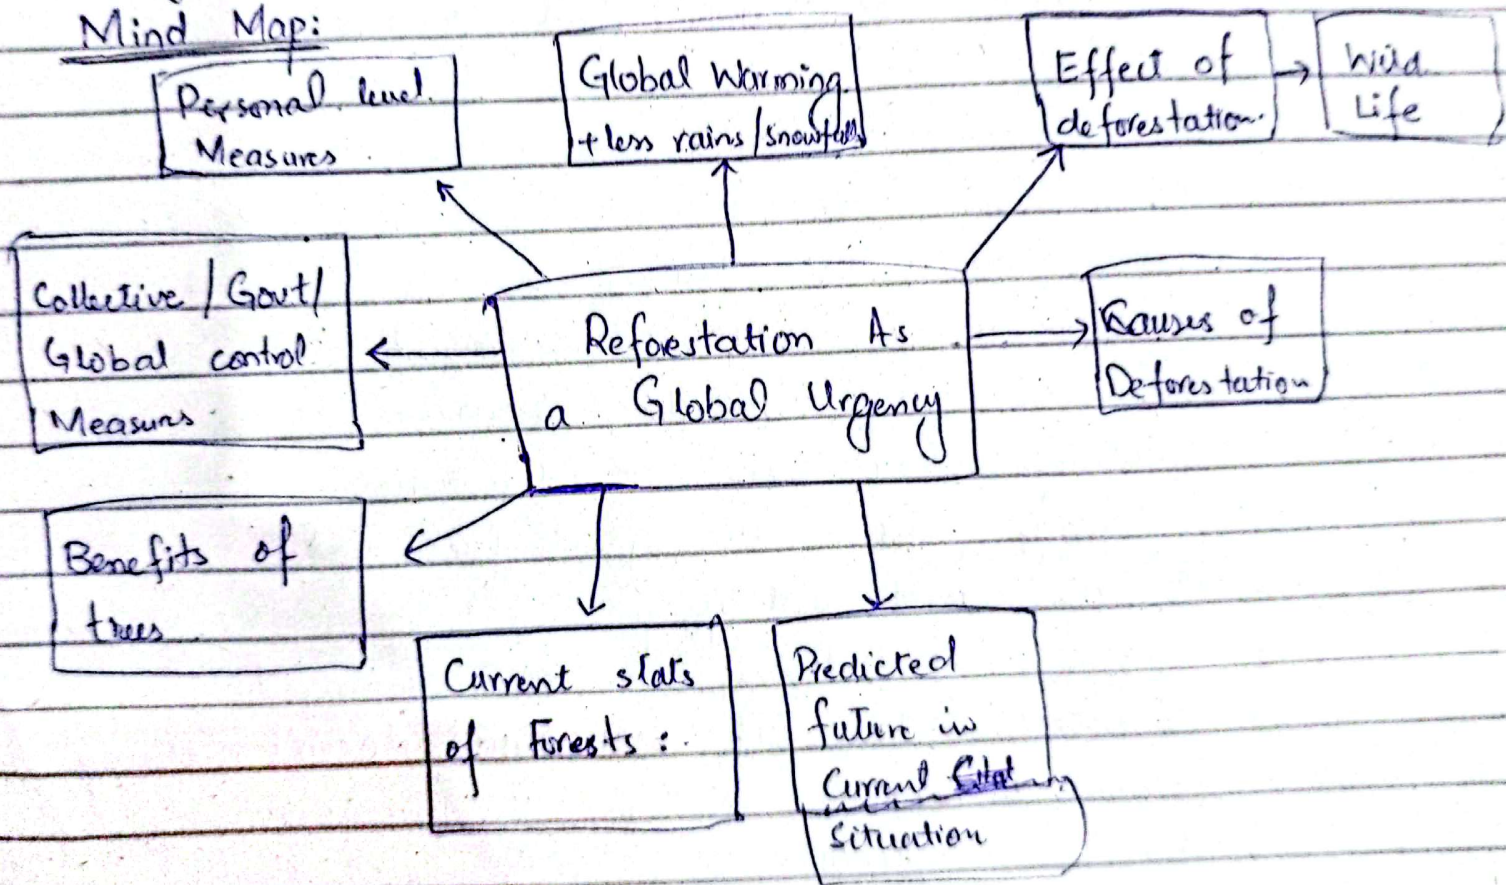

Questions : Why and How.

Themes : Zameen.

Type : Expository Essay.

Target : Global.

Mind Map:

Outline

Reforestation as a Global Urgency.

- 1- ~~The~~ Why do we need forests?
 - Benefits for mankind.
 - Benefits for wild life
 - Benefits for Earth and Universe.
- 2- Causes of deforestation
 - deforestation for industry needs.
 - deforestation for housing projects
 - Natural causes (climate changes).
- 3- Where are we standing now?
 - Statistics for rate of reforestation.
 - Statistics for rate of de-forestation.
 - ^{Impact of deforestation} Climate and wild life
 - Impact of deforestation on mankind.
 - Predicted future (if situation doesn't change)
- 4- Recommendations
 - Personal Measures.
 - Collective Measures.
- 5- Case Studies
- 6- Conclusion / Summary.

Introduction:

Imagine a world with unbreathable polluted air, extreme weather, ^{with} glaciers turned into water, major wild life gone extinct and scarcity of food sources; that's the world where deforestation is taking us. According to the Forest Declaration Assessment 2021, approximately 6.37 million hectares of forest were lost worldwide in 2023 alone. With ~~its~~ ^{increasing} adverse effects of deforestation, ~~smart~~ reforestation, has definitely become a global urgency. Smart reforestation with advanced technologies is the solution to stop ~~an~~ more damage and to ^{undo what} _{some extent} has already ~~went~~ gone wrong.
