Monsoon in Lahore 14:38

It's not only the rain that comes with monsoon, it also brings joy and happiness. The hide and seek of cloud with the sun, the wind, and the waving grass... every scene is a peice of art.

Monsoon has always enhanced the beauty of Lahore. The light showers, the heavy rains both make the green of leaves pop out. After bearing 40°C whel summer, monsoon feels like cool morning breeze.

Monsoon doesn't have all positives too, just like all of us. There is a significant increase in various diseases, especially those related to gut health. Moreover, the still water in the streets, after rain, all over Lahore is a major issue for pedestrians. This still water also contributes to more moquito breeding and generally a bad odour. Despite all of these issues monsoon remains beautiful and our beloved weather. These issues only highlight the negligence in our system.
