

— Writing practice. —

Government role in human development is extremely compromised. moreover media is ^{also} not considering this issue to highlight the importance of human development.

Govt. is preoccupied by debt and Pakistan's economic crisis that it has neglected human development. which is very essential component for any prosperous nation. World bank says: "Pakistan will suffer economically in future if it will not invest in human Capital."

Education plays fundamental role in human development. but, in Pakistan 26 million kids are out of school. which is against our constitution Article 25-A. Till date there is no evidence of Practical action taken by government. To conclude above discussion education is vital for Pakistan's prosperity

— Paragraph 2 —

AI work should be monitored or we can rely on AI blindly??

AI is advancing technology, but incorporation of AI in work and lives without considering the harms of bots will be dangerous for us. Pakistan like all other countries wanders about AI usage but it is in need of National AI policy. As Kenya intend to use AI but they use AI for building Digital future not for making human useless. In Pakistan State bank is working to finalize AI policies but our media is way behind in following such protocols. which can pose massive harm. So proper surveillance of rising technology will open more gates to prosperity rather than blindly relying on it.
