- (a) Encouraging to manage careers and relationships together.

5. Conclusion

- (a) Recap causes and effects.
- (b) Emphasize empathy and support.
- (c) Marriage should be based on right choice not age.

Introduction Paragraph

"Marriage is not about age it's about
Finding the right person" Sophia Bush

In this age where personal growth, education, and career goals are increasingly prioritized the timeline for marriage has shifted dramatically. What once was considered a natural step in early adulthood is now often postponed, especially among the educated urban population. Delayed marriages are no longer unusual. They are becoming a reflection of modern and changing lifestyle. While this trend has many advantages it also raises concerns about social pressure, loneliness and strained family dynamics. Understanding the root cause and longterm consequences

of this shift is essential if society is to
respond with rather than judgement.
