

Comprehension 2018

Question: 1

This generation does not know how to make an effective use of knowledge. Science has led to inventions of machines in order to make our lives easier and comfortable. However, instead of making machines our servants they have become our masters. We need to fulfill their needs first to get our work done. According to the author, ~~we are~~ our dependency on them is increasing day by day. Therefore, we need submit to their requirements.

Question: 2

Machines save time and effort but according to the author people do not use it meaningfully. Machines are made to make our work less complicated and give us more free time to enjoy and rest. However, we use this time in making more and better machines and this cycle ~~continues~~ continues. Therefore, it has become a curse rather than a blessing because there is no productive use of that extra time we get from these machines.
