- (4) Conclusion

Dr. Alaa al-Najjar, a pediatrician, was serving her patients in the hospital when she got the news that her 9 children had passed away because of Israeli strike on their home. This Hamas-Israel war started back in October 7, 2023 when Hamas attacked Israel through naval, air and land ways. Since then, Israeli has started targeting innocent people of Gaza for the sole reason that they belong to Palestine. Thousands of children, women and men have lost their lives, yet Israel's thirst for this innocent blood has not been quenched. This conflict has served as a litmus test of world conscience. The world has miserably failed the test because of its ineffectiveness to save the Gazans and stop Israel. Israel has breached international law by killing civilian but international organization and world ~~did~~ ^{did not} question Israel. Western ~~most~~ countries even supplied ammunition to Israel to kill innocent people. Many of the resolutions against Israel were vetoed by US. People of world were busy in enjoying the luxuries of lives but Gazans' access to humanitarian aid was blocked.

Israel. Thus, this conflict has produced the result that world conscience has been perished because of blatant human rights violations and surprising hypocrisy of western world, limited verbal opprobrium of ~~non~~ Muslim world and ineffectiveness of international organization.
