

Topic: Opportunities for Pakistan's growth and development

Pakistan is an under developing countries and it is suffering with a debt crises, which also poses negative effects on its foreign policies. However, there are multiple opportunities for Pakistan to overcome its challenges and helps in Pakistan growth and development. First of all, Pakistan has to encourage renewable energy resources, to stop its dependency on expensive import of non-renewable energy ~~source~~ sources. To overcome dependency on non-renewable sources, there is an urgent need to build dams. And also starts utilizing renewable resources such as wind turbines, hydro power and solar energy to generate cost-effective energy and helps in reducing carbon-emission in atmosphere. It is one of the best opportunity in Pakistan growth and development. Secondly,

CPEC (China Pakistan Economic Corridor) also encourage development in Pakistan. CPEC leads to develop new job opportunities, which reduces the poverty and unemployment rate in Pakistan. Thirdly, OIC (Organization for Islamic Cooperation) is also helpful not just for Pakistan but all Muslim countries. When all Muslim countries unite together and build a strong relation with each other, they will become a s it will lead them to grow together. Fourthly, currently Pakistan is putting its great efforts to build a good relations with Russia and Iran. Because, good relation of Pakistan with Russia, makes Pakistan defense system more strong. And Pakistan good relation with Iran encourage the prosperity in Central Asia. Fifthly, if terrorist groups in Afghanistan, stop spreading terrorism in Afghanistan, it will not only bring the peace in Afghanistan, but it also brings the prosperity and peace in Pakistan. Sixthly, Pakistan is a country which has a great ratio of female gender in the country. If Pakistan starts putting efforts for women empowerment, almost more than half of the population will become productive for the country development and growth.

Seventhly, encouraging entrepreneurs in Pakistan will bring more innovative ideas in the country and also ^{helpful in} generating new jobs opportunities. Eighthly, online shopping websites are emerging opportunities to

- starts earning from home. It also encourages new business ideas. And also helpful for people who are not able to work from the outside of their house. Ninthly, if Pakistan starts ~~build~~ teaching and education programs on Information Technology and Artificial Intelligence, it will be helpful for Pakistan to compete with rapidly changing world. Lastly, Agriculture sectors in Pakistan plays a great role as a backbone of the country. If the country, starts teaching and awareness programs for the farmers to teach them new farming techniques and help them to use new farming tools, it will increase the productive quality of crops and agriculture in the country. In conclusion, there are multiple opportunities for the development and growth of Pakistan. However, there is a dire need to put efforts in these opportunities and makes a good strategies and policies to make Pakistan ~~happy~~ wealthy and prosper country. (469)
